# **3lackmail Seen** n Security Leak To U.S. Military

By Seymour M. Hersh

WASHINGTON, Jan. 13 (NYT).—The White House told the Senate tergate committee last summer that a government official who ticipated in the investigation of the unauthorized passing of National urity Council documents to the Pentagon had, in effect, sought to ackmail" his way to a more important job by threatening to make secret material public sources said.

These sources said that the threat had been made in the midst of white House investigation into what was believed to be a military spy ring. President Nixon rejected the unidentified official's demand but did not order him discharged, the sources said.

The official's identity could not be learned, but one source said he had demanded a key job in the military bureancracy.

Another source said that the official may have been involved himself in the passing of un-authorized materials to the Pentagon, but this could not be con-firmed. All agreed, however, that a serious "blackmail" attempt had been made. .

The sources cited an inquiry nitiated in late 1971 by David R. Young ir. a member of the White House "plumbers" group established to stop leaks of information. The inquiry began shortly after publication of the India-Pariston papers by Vale India-Pakistan papers by Jack Anderson, the columnist, indicated that what amounted to an American military spy "ring" was active inside the National Security Council, the sources said,

Classified Material ...

The spying operation, the idential adviser on national-rity, wanted to determine ther his secret diplomatic sources said, involved the passing of highly classified material from the National Security Council to the Pentagon, It was centered in the office of Rear Adm. Robert O. Welander, who was then the military listson officer attached to the council, the sources said. One of Adm. Welander's aides; Yeoman 1st Ct. Charles E. Bradford, was determined to be part of the military information network, the sources said, as were others whom the sources would only describe as "government of-

ARAB UNION—Libyan leader Col. Moamer Qadhafi (left) and Tunisian President Habib Bourguiba signing accord Saturday after agreeing to union between their two countries.

# Tunisia, Libya Agree on Merger, Other Arab States Are Skeptical

TUNIS, Jan. 13 -- Tunisia and Libya yesterday announced they will merge into one single country but some other Arab states appeared skeptical about the out-come of the venture as proposed by two such disparate states.

Previous attempts during the last 15 years to merge Arab na-tions have failed and some Arab commentators outside Libya and Tunisia doubted that the two countries could succeed in carrying out the dream of uniting the Arab world.

The proposed union was an-nonneed in a brief communique here after President Habib Bourguiba, 70, of Tunisia and Libya's leader, Col. Moamer Qadhafi, 31, island of Dierba.

.The communique said the two countries would unite into a single republic-one president, gov-ernment, army, constitution and flag—the Arab Islamic Republic.

Referendum Reset President Bourguiba said that a referendum on the union, which was initially set for Jan. 18, would be postponed to March 20 "for reasons of procedure."

The referendum was at first announced for Jan 18 in a statement read by Tunisian Foreign Minister Mohammed Masmoudi. Libyans also will vote on the

In Libva's main cities, the news led to joyful demonstrations, tha Libyan News Agency reported. Here in the Tunisian capital the satisfaction was more muted, with students chanting in the

President Bourguibe said the

new unity would help in "facing and meeting our enemies, particularly Israel." He said that he hoped Algeria and Mauritania would joth the union, and "pos-sibly Morocco, once this country has settled its own problems." Morocco is North Africa's only remaining monarchy, and Presi-dent Bourguiba earlier had said that it was "still living in the feudal age and was ruled by a bloodthirsty tyrant—a reference to King Hassan II.

Criticism of Libya

In December, 1972-the last time Col. Qadhaff made an offi-cial visit to Tunisia—President Bourguiba harshly criticized Libya, Mr. Bourguiba, who was convalescing at that time from a tend a rally at which his guest spoke. He watched Col. Qadhail on television. When Col. Qadhafi. during his speech, proposed Arab unity, Mr. Bourguiba grew cest-less, summoned his chauffeur and drove to the rally where he rebuked his visitor.

"President Qadhafi visits me and proposes unity. He asks me to be president of the union. Qadhafi is sincere and full of enthusiasm... but I believe he lacks experience needed to judge the requirements of such a mission. Unity is nothing on paper. It is the mentality that must change... that may take years or even centuries. In Tunisla wa baye inter-tribal differences, in Libya there are areas like the Rezzan where they are still in

ing what made Mr. Bourguiba change his mind on the merger

Tunisia, with a population of 5.1 million and an area of 63,000 square miles, has virtually no resources. apart from tourism and a small petroleum production. Libya, with 2.1 million per-sons and 679,000 square miles, is one of the world's largest oil and natural gas producers, with revenues approaching \$4 billion

Concerning Col. Qadhafi's motives, Lebanese newspapers today suggested that spite and nge were the main reasons why he turned his back on Egypt. The papers said the Libyan leader, a staunch proponent of Arab union, was

"Egypt is a great country

has been quoted as saying. But he also has his differences with President Bourguiba, Mr. Bourguiba had been the only Arab leader to openly call for recognition of Israel and negotiations with that country provided it withdraws from all occupied territories. Col. Qadhafi continues to call for a holy war on Israel and the liquidation of the Jewish

There are other basic differences between the two leaders. Mr. Bourguiba has been consistently Western - oriented and has received considerable U.S. economic aid since Tunisia became independent in 1956. Col. Qadhail has maintained en anti-American attitude and closed the huge U.S. Wheelus Air Base near Tripoli when be took power after a military comp in 1969.

Mr. Bourguibs, opposes Moslem traditionalism and allows family-planning programs and other breaches of the religion, while Col. Qadhafi orders strict adherence to Islamic law, and, for example, has closed all Libyan night clubs and banned liquor. The setting itself of the two leaders' meeting emphasized the

# Israelis Approve Plan Drawn With Kissinger

## He Returns To Egypt With Offer

By Terence Smith

JERUSALEM, Jan. 13 (NYT). -The Israeli government today approved a specific proposal for the separation of Israeli and Egyptian forces along the Suez Canal and authorized U. S. Secrctary of State Henry A. Kis-singer to present the plan to the Egyptian government,

The cabinet approved the plan this morning in a session that lasted one hour and 45 minutes. Teams of American and Israeli officials had worked through the night to complete the draft.

After meeting nearly continu-

ously with Israeli leaders during a tightly scheduled 26-bour visit here. Mr. Kissinger left this evening for Aswan, on the Upper Nile, where he and Egyptian President Anwac Sadat are expected to discuss the proposed

[In Aswan, George Vest, the State Department spokesman, said that Mr. Kissinger would meet with President Sadat tomorrow morning, the Associated Press rc-

No details of the proposal were disclosed, but both American and Israell officials said that they were optimistic about its chances being accepted by Egypt.

Ranking officials traveling with Mr. Kissinger indicated privately that President Sadat had adopted a significantly more concilutory tone in private than has been reflected in Egyptian govern-ment statements. The officials said they believed that the gen-eral outlines of a disengagement agreement could be agreed upon by both sides within the next 24

"This is the crucial stage," an American official said late today. "We should know the results in a

After his talks in Aswan, Mr. Kissinger is expected to return discussions with Israeli leaders. He will then visit Jordan-where the government expects him on Tuesday-and perhaps Syria before returning to the United States by way of Europe.

# Saudi Sees 'Disaster' If Bloc Forms to Battle Oil Nations

By Paul Hofmann

ROME, Jan. 13 (NYT).-Saudi Arabia's oil minister, Ahmed Zeki Yamani warned oil-consuming nations yesterday against forming a bloc that may clash with pro-ducing countries in a head-on

"The result for the whole world would be a disaster." Mr. Yamani said in a news conference here. The Saudi minister denied a suggestion by a newspaper in Kuwait that the Arab oil-pro-ducing countries might blacklist all nations that participate in the world energy talks in Wash-

ington, starting Feb. 11. But Algeria's minister of industry and energy. Belaid Abdel Salam, said that the proposed Washington conference was being convened essentially to solve "problems that are purely American." Mr. Abdei Salam is ac-

· Military, political problems seen for any intervention by West Page 2.

and then left for West Germany. Mr. Yamani said that he would later visit Japan, but had no immediate plans for going again to the United States.

The Saudi minister said that his country was not supplying "a drop of oil" to the United States. We not only boycott the United States, but also any refinery unywhere in the world that supplies petroleum products to the United States," he said.

Asked about the responsibilities of the international oil companies in the present crisis, Mr. Yamani said: "The companies aren't alone in this. Consumers put too much raise prices. There has also been too much waste of oil."

The Saudi minister said that the low price of oil in the 1960's had made it "prohibitive to invent in any other source of energy. He said that Saudi Arabia thought that the present price for crude oil, set by the producing countries, was "a little on the high side." The minister remarked, however, that he thought the present price was "fair," although it might upset the economies of consumer countries.

an bour. It made a refueling stop at an Air Force base in Oklahoma. When Mr. Nixon flew to California on a commercial jumbo jet, the White House said that the President had chosen to fly this way "to set an example for rest of the nation during

the current energy crisis." Reporters covering the President during his Southern California stay were notified of his departure for Washington as the Jetster was taking off. The White Houss said that the President had "decided to go back this evening so he could rest tomorrow, watch the [professional football] Super Bowl and be ready to work at the White House

ALGIERS, Jan. 13 (AP) .- The official Algerian newspaper Al Moujabld charged yesterday that the United States was resorting to "gunboat diplomacy" in calluig for a conference of major oilconsuming nations next month.

# Military Gradually Assuming Top Civilian Jobs at Pentagon

By John W. Finney

WASHINGTON, Jan 13 (NYT). -The generals and admirals are gradually infiltrating the ranks of the office of the secretary of defense that originally was created as the citadel of civilian control over the military.

At present, 10 generals and admirals serve as deputy assistant secretaries of defense - policymaking positions near the top of the Defense Department hierarchy. There are nearly 50 such deputies. In the original concept, these positions were supposed to be filled by civilians.

Ten years ago—at the height of civilian control over the Penta- partment. An Air Force major gon under the regime of Defense general is the deputy assistant and an Air Force lieutement gen-

only three flag-rank military of-ficers held the civilian rank of deputy assistant secretaries of defense. And 25 years ago, shortly after the creation of the Defense Department, no military officers held such policy-making jobs.

Two lieutenant generals from the Army now hold key positions in the Defense Department's manpower office, making policy personnel matters that account for 56 percent of the defense budget. A Navy vicc-admiral directs the Pentagon's military air program to more than 40 countries. An Air Force lieutenant general serves as deputy spokesman of the Defense Desceretary of defense for congres- cral is in charge of management the evolution of the office of

sional relations. In the Defense Department Office of Research and Engineering, which directs the multibillion-dollar program of weapons research, an Army lieutenant general is responsible for policies on how to develop weapons. A retired Army lieutenant general directs the test and evaluation of weapons under development. Two Army major generals hold policy-making posts in the Office of Health and Environment. an Army lieutenant general serves as deputy assistant secretary of defense for intelligence, an Air Force major general is in charge of policy planning in the Office of International Security Affairs

in the Defense Department's unications Office.

About the only Defense Department division that has remained immune to the infiltration by the military is the Comptroller's Office. That office supervises the budget. And only there have the career civil servants maintained a firm hold, as in the case of Don R. Brazier, who rose up through the ranks recently to become the principal deputy assistant secreta-

ry of defense for the budget. The growing tendency toward putting military officers in policymaking positions in the Defense Department is causing concern among some civilian officials of the Pentagon as well as longtimo congressional observers of

secretary of defense. It raises questions of whether the basic legislative principle of civilian control over the military, exercised through the defense secretary's office, is being undermined end whether in that process the military is being progressively "politicized" by encouraging officers to serve in what are essentially policy-making civilian

Reversal Not Easy

Between the difficulties of recruiting civilians to serve in tha Defense Department and the readily available expertise of a new generation of officers trained in policy management, however, concerned and skeptical obcan be reversed. The 1947 National Security Act. which created the Department of Defense, explicitly stated that the purpose was to provide "for unifled and civilian control" over the military services. The law provided that military officers could be assigned as assistants or personal aides to the secretary of

defense but, in reaction to the

concept of a "Prussian" general

staff, specified that be could not establish a military staff. In some ways, the growing influence of the military in the policy circles of the Defense Department is a reaction to the concept of centralized civilian control established during the McNamara regime

# **Dutch Face** Decision on Natural Gas

By Paul Kemezis

GRONINGEN, the Netherlands, Jan. 13 (NYT). - The Netherlands, with an Arab oil embargo still aumed at its huge oil transport end refining industry, is one of the countries hardest hit by the world oil shortage, yet its overall energy situation is one of the best in Western Europe.

The world's largest known singie bubble of natural gas, convenicatly located under the flat farmlands near Groningen in the northern part of the country, contains enough fuel to fill almost half of the Dutch energy needs for the rest of the century and still leave plenty for export.

But the Netherlands, with the world's fourth higgest gas reserves now faces many of the same hard decisions about future exploitation of its natural gas that the Arabs face with their oll. The immediate problem is whether to step up domestic gas consumption to take the edge off the oil shortage, which forced the start of gasoline rationing Saturciay.

The rationing plan, which is designed to cut gasoline con-sumption by 20 percent, ellows each driver 15 gallons for the three-week period ending Feb. 3, plus extra fuel for professional uses except commuting. Diesel

fuel is not rationed. The Netherlands must weigh the temptation to increase ges consumption from the present 45 percent of its total energy needs against the long-term objective of making reserves last at least up to the year 2000, when new energy sources are expected to take over.

Prodoction Boosted

In December, when the oil shortage began to hurt, the government ordered a step-up in 1974 gas production from the planned 83 million cubic meters to 87 billion, and a speedup in completion of the domestic gas

delivery system. One alternative to increased production is to limit exports, which totaled 32 billion cubic meters in 1973, or 46 percent of production. But the deliveries are guaranteed in 20-year contracts signed with Belgium, West Germany. France and Italy in the days before the energy shortage

Premier Joop den Uyl has said that the Netherlands would be forced to cut this gas flow if, in a real fuel crunch, the receiving countries refused to export oil to the Dutch because of Arab pressure. But, for the present. there is no indication that cuts are planned.

An official of the Netherlands Gasunie, the semipublic concern that distributes the gas, said, "It would be suicidal for us to break the contracts: We don't want to be known as the Arabs of Eu-

New Look at Prices

But due to the rising oil prices, the Dutch have taken a new look at their export pricing policy. Since the contracts were negotiated in a period when oil prices were expected to fall, no mechanism was included linking the price of the natural gas (in the range of 1.5 to 2 U.S. cents a cubic meter, to competing fuels. In light of developments however, the Dutch have recently negotiated such a price link with France and Belgium and will do the same with West Germany.

The problem with Italy is erester, greater, since the contract hastily negotiated by former Dutch Foreign Minister Joseph Luns to head off a Soviet-Italian gas deal fixes prices with no provision for a change. The Dutch say they will discuss the problem with Italy.

20, rue des Capucines :=

CAM AN, South Vietnam, Jan. through minefields and clude government checkpoints to find his buyer: the Vict Cong.

Cam An straddles governmentheld Highway 22, some 55 miles northwest of Saigon. In the soft light of early morning, farmers leave the bamlet and walk east to till their rice paddies, which are held by the Viet Cong. Whatever goods the peasants are willing to carry in defiance of government orders, the Viet Cong will buy at exorbitant prices.

Here and throughout South Vietnam, a clandestine commerce has grown up wherever the shifting, porous lines of government and Viet Cong control approach each other—along lonely canals, down winding dirt paths, in the vast sweep of rice fields and

In one way, the trade has been a hopeful sign that, despite the harsh rhetoric of high officials, the warring sides may develop some form of interdependence and reconciliation on local levels. This was the view of some American officials in the early months following the Paris cease-fire agreement of last January. They saw free trade as a by-product of what they hoped would emerge militarily: understandings in the field between opposing local commanders on claims to territory,

areas of patrol and the like. Some of this took place. Last July, for example, U.S. intelligence sources said that commanders of Viet Cong and South Vietnames Army units near the Central Highlands city of Kontum agreed by radio that the Viet Cong would be allowed to enter a government-held village to make purchases in exchange for giving government troops permission to go hunting in some Viet Congcontrolled woods.

But South Vietnamese generals objected to such understandings and the practice never became as widespread as the fighting did. Nor did trade and commerce between the sides get much of a chance to flourish before the gov-ernment clamped an economic blockade on the Viet Cong. mobilizing the entire police and military structure in an effort to stop the flow of goods to Com-munist-controlled regions,

The trade persists, not openly and probably not in great volume. according to officials, but secretly in whatever amounts a peasant can carry when he walks to his fields or a villager can hide beneath the seat of his motorbike.

The main engine of this commercial activity is the Viet Cong's business acumen. For the Communists consistently outbid those who live in government areas, paying up to two and three times the normal prices for machine parts, gasoline, medicine, betteries, cloth, bicycle tires and for rice, sugar, salt, tea and con-

densed milk. The government argues that it also needs rice badly, as well as gasoline and other goods that flow to the Viet Cong. Furthermore, the war is still on, the Viet Cong are still "the enemy" and the economic blockade is regarded as an essential ingredient of warfare.

More than 100 miles southwest of Saigon, in a lush agricultural region accessible only by a net-work of canals, huge banners are hung across the marketplace in village of Tan Hoa, declaring. "To Give Supplies to the Communists Is to Betray the Country" and "To Isolate the Enemy Economically Is to Destroy

Its War Potential." This is a long way from the language of the Paris agreement, which permits freedom of movement, and of the June 13 toint communiqué of U.S. Secretary of State Henry A. Kissinger and the North Vietnamese negotiator, Le Duc Tho, which stated, "The above - mentioned prohibitions," referring to military movements into each other's territories, "shall not hamper or restrict civilian supply, freedom of movement, freedom to work and freedom of the people to engage in trade and civilian communication and transportation between and among all

areas in South Vietnam." Furthermore, the military effectiveness of the blockade is subject to conflicting estimates, with President Nguyen Van Thieu declaring that it has substantially weakened the Communists, but with some knowledgeable officials concluding that the Viet Cong still have plenty of rice to estalthough they may now have to

spend more effort acquiring it and getting it milled. Here and there, the Viet Cong have set up minor blockades of their own in an attempt to stop luxury goods from entering their The VC are trying to become self-sufficient," a Western diplomat observed, "but they're really part of the government

### Crosby Undergoes Operation on Lung

BURLINGAME, Calif., Jan. 13 (AP).—Bing Crosby had twofifths of his left lung removed in an operation today after tests suggested that the singer might have cancer, his doctor said.

But an initial study of tissue removed in the operation indicated that the 69-year-old Mr. Croshy might bave a rare fungus infection in the abscessed lung, said Dr. Stanley Banfling, Mr. Crosby's family psysician. He said Mr. Crosby was in satisfactory condition and tests were continuing to determine whether

cancer was present.

# Thais' Complaint: Japanese **Dominate Nation's Economy**

BANGKOK, Jan. 13 (AP),-What Japanese in Thailand?" asked a That, tongue in cheek. "I never see any."

The crack reflected a fact of life here, one of the facts that contributed to last week's angry demonstrations against visiting Japanese Premier Kakuci Tanaka and to a student leader's threat of violence against Japanese in Thailand.

The average Thai sees little of Thailand's resident Japanese community. But the Japanese Chamber of Commerce says that 6,000 Japanese men, women and children live and work here, mostly in connection with the 283 Japanese ventures participating in the Japanese Chamber of Commerce in Thailand.

There are two Japanese country cinbs, a Japanese school, Japanese apertment buildings and a dozen Japanese restaurants.

In addition, 160,000 Japanese tourists came to Thailand last year, second only to Americans, and spent up to \$50 million. The tourists muffled but did answer the Thai complaint that the tourists arrived in Japanese planes, stayed at Japanese hotels, toured in Japanese buses and ate

at Japanese restaurants. If social mingling between Thais and Japanese is rare, busi-ness mingling is everywhere. Japan is the largest foreign in-

UPL. Japanese Premier Kaknei Tanaka trying on an ancient Thai mask in Bangkok Saturday after watching a performance of classical dance during visit there.

### No Drop Seen In Tourism By Japanese

TOKYO, Jan. 13 (AP).-Despite higher costs, official restrictions and gloomy economic prospects at home and abroad, Jepanese tourists are expected to go overseas in record numbers again this

That's the opinion of government officials, travel agents and airline executives here. And it spells good news for a lot of people in foreign countries who have come to rely on the free-spending Japanese for their tourist trade.

Shigeyoshi Matsusato, a planger in the Transport Ministry's Tourist Division, forecast that 25 million Japanese may vacation abroad in 1974 an increase of about 9 percent from the 2.3 million who yentured overseas last year.

ficers in Phnom Penh and com-manders in the field, is at least 3,000. The offensive was preceded by sporadic attacks with 122-mm rockets attacks that began in mid-December and have killed at least 40 persons, mostly civilians, in the capital idealf. In the same period, there have been several terrorist attacks in the city, including one on the home of Maj. Gen. Sosthene Fernandez, commander of the government armed The military command says

that it killed several hundred rebels last week and that only, "light" government losses were ststemed

WASHINGTON, Jan. 13 (NYT). -A comment by Secretary of Defense James R. Schlesing r that there was a "risk" that military power might be used agamst the Arabs if oil curbs become really severe has aroused a storm of protest in the Middle East.

Mr. Schlesinger's remark has

also produced an acknowledgment by military circles of the difficuls of "gunboat diplomacy" in the contemporary world. Mr. Schlesinger has said since making his original comment that the likelihood of deployment of Western military power in the Middle East is "extremely low." The United States remains ded-

icated to the independence of free states, he emphasized and that includes the states of the Middle East.

The original statement, made in a television interview that was broadcast Monday, was made in response to a question whether there might be increasing de-mands from Americans to show force, I. the Arab embargo began to hurt severely. Mr. Schlesinger conceded "that that is a risk" and added:

"We should recognize that the independent powers of sovereign states should not be used in such a way as would cripple the larger mass of the industrialized world. That is running too high a risk, and it is a source of danger, I think, not only from our standpoint but from the standpoint of the oil-producing nations."

The comments brought into the open a discussion that has been going on in the United States and Western Europe almost since the curbs on produc-tion and sales were announced during the Arab-Israch war in.

British members of Parlia ment, in ur fficial contacts in London, have discussed military intervention with American officials. The Economist, the British weekly, implied editorially that the Arabs should not omit possible military retaliation from their calculations, and a Lebanese weekly magazine, Al Diyar, pub-lished what it described as the details of American contingency plans to occupy the Persian Gulf

Military sources, discussing the subject of intervention, generally are cantious. They say that such operations, which would probably forgotten in the West because the involve airborne troops at the outset, might be easy to launch, but that there would be serious problems in sustaining them. Additionally, Sandi Arabia and Ku-wait reportedly have minch their main oil fields to that they can be destroyed in the event of an intervention.

state Departme military sources also stress that any intervention would involve a serious risk of Soviet military action in the Middle East. Moreover this might well be on a scale far larger than in October, when four Soviet airborne divisions and a fleet of transport aircraft were assembled, apparently to call at-tention to the threat of intervention in the Smat Desert to boister the \*mnous Arab-Israeli cease-fire.

A minority in the military and diplomatic community argue that the Russians would do no more than protest vehemently in the United Nations and exploit any Western intervention to strengthen their political position in the Arab rorld. The Russians, this group says, would "understand" because they would do the same things in similar circumstances. American troops immediately

Judging by the actual words used at the meeting, the motion said, "the President could be said, "the Fresident could be thanking the dairy farms for their financial support," of which he had been told by Mr. [Charles M.] Colson in September with a suggestion that he 'acknowledge' it ... and of which he had been reminded just before the meeting . . . instead of thanking them for 'support' of his 'policies.' The

The motion was filed for the purpose of asking the court to require the White House to turn over other tapes and documents relating to the milk case over which Mr. Nixon still claims

Conflict Appears At the same time, it would seem that the White House explanation that political considerations and congressional pressures contributed to President Nixon's decision to raise milk price supports is in direct conflict with a sworn statement by former Secretary of

Agriculture Hardin.

Mr. Hardin's affidavit, filed in

Mr. Nader's suit at the U.S. District Court here on March 12. swore that he had reconsidered his earlier decision to hold the price support level and ordered a rise in the price supports solely "on the basis of statutory criteria."

The law requires that decisions on price supports be made solely on the basis of supply, costs and nomic criteria. The White House "white paper"

on the milk price support decision, issued Tuesday, rejected as that campaign pledges played any role in the decision-making pro-

However, the paper did state that the President himself decided that "traditional political considerations," along with congressional pressures and economic evidence, dictated that the wishes of the dairymen be granted and the price support be raised.

# Secret Diplomacy by U.S. Led To Bureaucratic Strife in 1971

# 2 Congressmen Find South Is Opposed to Impeachment

By Marjorie Hunter

SELMA, Ala., Jan. 13 (NYT) .-From the foot of the Edmund Pettis Bridge, Watergate seems as remote as the civil rights clash that took place at the bridge's end in 1965.

For here, as in many other parts of the Deep South; the talk about Watergate and the possible impeachment of President Nixon is subdued. The fe - who raise the subject dismiss it as little more than a Northern liberal plot some even suggest it is a Communist-inspired plot—to embar-rass the President

rass the President,
"I get the feeling that folks
down here just want Watergate
to blow away," Rep. Walter
Flowers, D., Ala., said one day
last week as he sat in his district
office, just around the corner from the bridge where the Rev. Dr. Martin Luther King jr. and his followers were abruptly helted by officers as they attempted to march to Montgomery.

Thirty or more constituents had dropped by the congressman's office that afternoon. Most of them had come to talk about their problems-veterans pensions, inability to get enough fuel for their farm machines and Social Security benefits. No one mentioned Watergate or impeachment.

Member of Panel Yet, Rep. Flowers is one of the 39 men and women who, as members of the House Judiciary Committee, will decide this year whether to allow a House floor vote on the question of impeach-ing the President.

Even more significantly, he is one of three Southern Democrais who might decide the outcome in committee. For while Democrats outnumber Republicans, 21 to 17, on the committee, the deciding votes could be cast by Reps. Flowers, Ray Thornton of Arkensas and James R. Mann of

South Carolina.

Three weeks ago, when Congress adjourned, Rep. Flowers came home to journey around his sprawling 7th District, an area embracing such conservative strongholds as Selma, the intellectual community around the University of Alabama and the highly unionized industrial suburbs of Birmingham,

He said that just one per on, a university law student, had urged him to vote for impeach-"Most folks who mention it at

all say. Hey. Walter, we don't want to tell you bow to run your business, but we don't want the President impeached," he said

peachment, he said. He wants to

learn all the facts before making a judgment. "The stench and stain of Watergate has reached us," he said at a public meeting. "But

I believe, at this point, that the

cloud will he lifted from the

Many mlies away, in a neighboring Mississippi district, the 5th, Rep. Trent Lott, too, is finding little sentiment for impeach-

"Nison's not a dirty word down here." he said one night last week as he sat munching a piece of homemade cake in the Hattiesburg American Legion Hall. A few minutes carlier, he had

been applauded vigorously by crowd of 100 or more men and women when he said: "I don't think Congress will impeach President Nixon."

Rep. Lott is a Mississippi Re-publican, a 33-year-old one-time Democrat who switched parties two years ago to capture the congressional seat vacated by his former boss, William Colmer, an ultraconscrivative Democrat. He. too, is a member of the House Judiciary Committee.

For three weeks now, he has been roaming through his district, speaking to subs and schools. shaking hands around court-houses perched in the center of little country towns.
"So far." he sold. "just two

people, a husband and wife, have told me they thought the President should be impeached." In Hattiesburg Legion Hall that night, no one raised the issue of impeachment.

Congressmen Potled

WASHINGTON, Jan. 13 (AP), The National Observer reports that a poll of 377 members of the House on impeachment shows 37 precent saying no or leaning toward no. 21 percent yes or leau-ing toward yes and 42 percent un-

In a story in today's editions, the Dow Joues weekly publication said it had reached 377, or 87 percent, of the 430 congressmen and asked them how they would

vote on impeachment now.

The breekdown showed 141, including 93 Republicans and 43 Democrats, in the no column: 75, including five Republicans and 73 Democrats in the yes column; and 152 including and 158, including 61 Republicans, 96 Democrats and one independent, undecided.

The res votes were concentrated mainly in New York, Massa-

### Ervin Sets a Condition for Ending Hearings—5 Undoctored Tapes

WASHINGTON, Jan. 13 (WP).—Sen. Sam J. Ervin Jr., D., N.C. said yesterday that the surrender of live key White House tape recordings to the Senate Watergate committee might bring its hearings to a "very speedy end."

The tapes are recordings of conversations between President Nixon and his former counsel, John W. Dean 3d, who has testified before the committee that Mr. Nixon was aware

of some Watergate cover-up efforts.

If the five tapes were given to the committee and found free of gaps and doctoring. Sen. Ervin said in a television interview in Troutman, N.C., then "I'd be inclined to say that we'd bring the hearings to a very speedy end."

However. Samuel Dash, the committee's chief counsel, said

bad spoken to Sen. Ervin after the interview, and that the committee chairman's remarks were taken out of context, "I know be would not just be satisfied with getting the five original tapes," Mr. Dash said. Mr. Dash said Sen. Ervin's remarks were intended to be

tongue in cheek.

A committee suit to obtain the five tapes, subpocnaed along with other data in July, is pending here. Recently, the White House refused to honor committee subpocnas for nearly 500

tapes and documents. Most members of the select committee were reported last week to be undecided on whether the hearings should continue.

# Gen. Westmoreland Weighs Race for S.C. Governorship

By B. Drummond Ayres Jr.

CHARLESTON, S. C., Jan, 13 standing sentry tall, he still icoks like the commander of U.S. forces Vietnam. But Gen. William C, Westmoreland, 59 years old and 18 months retired after 3 final assignment as Army chief of staff, is suddenly talking and acting like a politician,

In between writing his memoirs and reflecting on the war that left him a controversial figure. he is "seriously considering" running for governor here in his native state.

"I'm motivated toward public service," he said. What about the war?

"I still think we're going to come out all right." Although he has already put in 40 years in the service of his country, in retirement he works two or three days a week for the state of South Carolina, heading a panel that is trying to spur economic growth. The job has taken him into each of South

Carolina's 46 counties, a fact that has been duly noted by both Democrats and Republicans.

Choosing a Party Like Gen. Dwight D. Eisenhower, Gen. Westmoreland had no particular political affiliation when be left the Army. And as was Gen. Eisenhower, be is being wooed by both partles now that he has indicated an interest in

"It's true that I lack political experience. It's true that I sometimes seem stiff and straighthacked. But I have a lot of managerial experience and I want

to put it to some good."
Should Gen, Westmoreland side with the Democrats, his first burdle would be a bruising primary battle with Rep. William Jennings Bryan Dorn, a represen-tative for 23 year and a formid-able force in the state party. Should the general join the Republicans, he might ovoid a tough primary, but it would put him in South Carolina's onnority

party.
The current governor, John C. West, a Democrat, cannot succeed himself. Gov. West was in trumental in persuading Gen. Westmoreland to retire in Charleston

and work on the economic panel. Although they refuse to disclose precise figures, leaders of parties report having nolls that show the general would make a good candidate. They do not think his association with the Victnam war would be a drawback, mainly because Americans no longer are fighting and Southerners tend to hold the military in higher esteem than

most Americans. He has reached no conclusion yet on whether the United States should have entered the war in the first place, but he has some fixed opinions oo "some of the peculiarities" after the involvement hecame a fact.

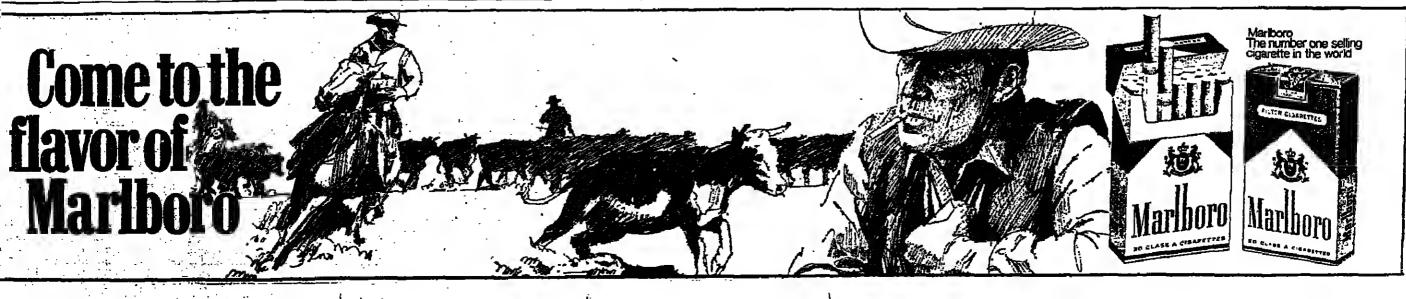

He says there was too much fear in Washington that the war would escalate into World War III. He thinks there should have been press censorship. He feels the draft was administered badly and put the heaviest burden on the poor.

He thinks the divisive debate over the war that racked the country for so long could have been avoided had Congress been asked to make, or had it refused to make, a formal declaration of

#### Russian Seaman Gets Quick U.S. Entry Visa

WASHINGTON, Jan. 13 Reuters).—The United States has granted an emergency entry visa to a Russian scaman who was rescued from a rubber raft off northern Japan this month, the State Department said Friday. A spokesman identified the

Russian as Peter Nikolayevich Kaoroyko, 26, a navigator third class who apparently jumped off a Soviet fisheries research vestel on Jan. 3. He acknowledged that the visa had been granted more quickly than was normal for ordinary applicants.

# Union in the Maghreb

The announced impending union of Libya and Tunisia makes better sense, geographically, historically and economically, than most of the other mergers of Arab states that were attempted by Nasser and by Qadhafi. Libya is a border land of the Maghreb, the group of Moslem territories along the Mediterranean comprising Libya, Tunisla, Algeria and Morocco. Between the deserts and the sea, these lands took on a character of their own-and, as the Barbary states, it was a character of ill omen to non-Moslem maritime communities The Maghreb, too, early established a virtual independence from the Ottoman Empire.

A section for the first term of the form of the first term of the

More recent history, however, tended to divide the Maghreb in . way that the local autonomy its segments enjoyed down to the 19th century did not achieve. Algeria was the first to fall to European conquest, and became a department of France. Tunisia and Morocco also came under French control, but later, and in different forms, with part of Morocco seized by the S anish. Libva or Tripoll as it was then known from its principal city, was the last to succumb-to the Italians, just before World War L Lihya was also the first, in the wake of Italy'e defeat in World War II, to receive that independence which the whole Maghtsb now enjoys.

Partly as a result of these differing backgrounds and partly through the variety of political experience which the portions of the Maghreb have known since 1945, the successful amalgam of Tunisla and Libya cannot be taken for granted - any more than the earlier experiments of the United Arab Republic launched by Nasser, or Col. Qadhafi's efforts to unite with Egypt.

On a number of practical levels, Tunisia and Libya have been cooperating. But the difference between the moderate, pragmatic government of Tunisia's sophisticated President Bourguiba and Col. Qadhafi's fierce adherence to some cloudy goal of Islamic identity and unity is as great as, say, that between the governments of Mexico and Coba. Like Libya and Tunisia, those two states share an official tongue and a great deal of history; they have cooperated in much and hold some principles in common. But can anyone now see them with a single president and a single flag?

One might hope that the ehrewd Bourguiba could temper the zeal of Qadhafi, and that the small but well structured Tunisian state might give the far larger Libya, with its great resources in oil but much more widely dispersed population, lessons in government. It would be tar less reassuring for the world at large if Tunisia, that center of moderation in the Arab world, joined in Qadhafi's jihad. Much then depends on the extent to which Bourgulba, in the words of the statement issued by bis foreign minister, responds to the call for the liberation of occopied Islamic Arab territories" The fact of Libyan-Tunisian unity is to be decided by referendum. Its global implications can only be guessed at now.

# Stronger Dollar

ago an object of derision among foreign central bankers, speculators and even hotel desk clerks, has regained much of its strength in world money markets.

What strengthened the dollar was, paradoxically, its devaluation from the unrealistic level at which it had been pegged in relation to other currencies before the Smithsonian agreement in December, 1971. That devaloation, followed by a second devaluation in February, 1973, and by the further downward float of the dollar, has at last swung the United States balance of payments into surplus.

From a trade deficit of almost \$6 billion in 1972, this country moved to a surplus of \$776 million in the first eleven months of 1973. As a result of this improvement and a parallel betterment in the overall balance of payments, the dollar recovered much of its lost value and is now only 2 percent below its rate following the first Smithsonian devaluation.

Before the imposition of the Arab oil embargo triggered the worldwide energy crisis, It appeared that the United States might run a payments surplus of as much as \$10 billion in 1974. Even though the oil crisis has played havoc with all such predictions not only for the United States but also for Western European countries and Japan, the impact on this country is expected to be much less severe than it will be on the

There is likely to be a huge outflow-estimated at \$50 billion - from the industrial nations to the oil-producing countries. Yet

The United States dollar, less than a year the United States, because of ite lesser dependence on foreign oil, still seems likely to ehow a moderate surplus on both trade and payments. On that basis, the dollar is likely to maintain its international strength or even go up in value this year while other currencies weaken.

> A further increase in the dollar's value, as a result of market action, would be no tragedy. On the contrary, since a more expensive dollar would reduce the outflow of United States goods and increase the inflow of foreign goods, it would have an antiinflationary effect, now so urgently needed. A costlier dollar would thus help to obviate the need for export controls on goods in which there is a shortage here; direct export controls infuriate foreigners—as was demonstrated when the United States restricted the outflow of soybeans-and invite retaliation; they are, in fact, a first cousin to the Arab oil embargo

Given the uncertainties of the world economy, it would make no sense to try to nail down the dollar at its present value. The United States Treasury bas rightly changed its strategy for negotiating reform of the international monetary system. Instead of trying to work out a detailed scheme for adjusting rates and everything else, it wants acceptance of floating currencies as legal under agreed rules. Any effort to rigidly fix exchange rates under the chaotic conditions of a world caught in an energy crisis would risk adding a wor.d monetary collapse to what already looms as a worldwide recession.

THE NEW YORK TIMES.

# Peking and Taiwan

The progress made in American relations with China since 1971 has been dramatic and it has led to repeated speculation about the possibility of completing the process by establishing full diplomatic relations, clearly a desirable aim. The only real obstacle has been inability to agree about Taiwan.

What made the breakthrough of 1971-72 possible was Peking's decision that the Taiwan question was not urgent. The result, during President Nixon's 1972 visit, was a "split" or partially disagreed communique. Peking expressed a separate view about Taiwan, stating that it was "the crucial question obstructing the normalization of relations" and making five specific complaints about Amercian policy there. The implication was that all five would have to he corrected before full diplomatic relations could be establisbed.

A substantial change, however, was made in this position by Premier Chou En-lai's final draft of the communique he and the United States secretary of state issued at the end of Mr. Kissinger's recent visit. The new communique appeared to reduce the five conditions of 1972 to one: that normalization "can be realized only on the basis of confirming the principle of one China."

No mention was made, as in 1972, of American refusal to recognize Peking as "the sole legal government of China." Nor was Washington asked to acknowledge that Talwan is a province of China and that "the liberation of Taiwan is China's internal affair in which no other country has the right initiative, which is all to the good.

to interfere." The withdrawal of "all U.S. forces and military installations" from Taiwan was not demanded. Nor was the United States asked to refrain from "any activities" supporting such notions as "one China, one Taiwan," "one China, two governments," "two Chinas," an "independent Taiwan." or that "the status of Taiwan remains to be determined."

Some of these 1972 conditions evidently were not repeated because they were or are being substantially met. But both in 1972 and in the recent Kissinger-Chou communique the United States properly insisted that there are two Chinese governments with which it desires to maintain relations. The United States remains firm in its treaty obligation to defend Taiwan.

Full diplomatic relations with Peking cannot be based on an American break with Taiwan which Washington is honor-bound to reject. It could be based on Peking's acceptance of something like the German formula of "two states in one nation." But that is unlikely. The administration's main aim now is to improve the substance of exchanges with Peking rather than the form.

The progress already made could rapidly achieve-if Peking wished-virtually everything that full diplomatic relations could bring with the exception that "liaison offices" would continue to serve in place of accredited embassies and ambassadors. The Taiwan problem seems to have been tacitly -if temporarily-shelved on Feking's own

NEW YORK-Dr. William Guthrie, the rector of the church of St. Mark's-in-the-Bouwerie, has sprealed to all the Episcopal clergy to back him in his fight against Bishop William T. Manning. The Bishop is shocked at the dancing before the altar of barefoot girls clad in Greek costumes. Dr. Guthrie says he will not cancel the performance as it is a creative and beautiful Christian act.

# Oil for the Arms of Europe

By C. L. Sulzberger

PARIS.—The nine-nation European community has been creaking at the seams ever since the current energy crisis began. The big question raised by President Nixon's proposed oil consum-ers conference is whether it will manage to close the barn door before the horses have fled into a nationalistic jungle.
Certainly the community has

not been acting as "Europe" in any united sense. It has been less coherent as a body than the hitherto disunited Arabs who didn't permit disagreements on other subjects to hinder their formulation of a joint petroleum policy. And they have since been followed, for reasons of compulsive economic logic, by such disparate lands as non-Arab Iran

and non-Moslem Venezuela. Producers that are neither Arab nor Moslem are not embargoing sales to Israel or its supporters, such as the United States and the Netherlands. Yet they have gone along with burgeoning price rises which, in themselves, comprise a form of boycott since most purchasers cannot afford any longer to buy the fuel they

#### The Fragility

These developments exposed the fragility of the European community which falled to move rapidly toward a more unified policy after it was joined by Britain, Denmark and Ireland in 1973. In-deed, its weakness was underscored by the astonishing col-lapse of the British economy. when coal miners chose to strike during the oil shortage, and by arguments between London Bonn and Paris over how much money should be contributed to develop the community's backward re-

When Secretary Kissinger spoke in London after attending the December NATO meeting, be first proclaimed the idea of a joint energy action group linking NATO and Japanese consumers. But the idea seemed to lapse while the Common Market intently dug its own grave. .

The Netherlands, with world's largest port, Rotterdam, serving as West Europe's petroleum entrepot, was left isolated by its community partners when the Arabs singled out the Dutch as pro-Israeli. And the chief Common Market oil users-Britain, France and West Germanystruck out on their own as na-tional governments, ignoring the community, to make private

international relations ex-

Every reasonable man wants to avoid nuclear war, but do we have to pay the price being ask-ed for the present detente? To judge from its course to date. 15 years more of one-sided concessions to the Soviet Union may find Western Europe "Finlandiz-ed," and the United States isolated in a position of such marked military inferiority to the Soviet Union as to gravely limit its freedom of action as a great DOWET.

No one contends that the Soylet Union has any intention of destroying the United States with nuclear weapons, but a growing number of people fear that it wants to be in a position where the United States cannot oppose its actions, especially those made in the name of "peace.".

The chief feature of the agreements made during the present detente has been their one-sided character favoring the Soviet

#### Meanings

Part of the public confusion about the present détente stems from a difference of view between the parties as to what détente means

The Soviets do not look on detente in the same way as Americans do, Most Americans believe that the word applies to conditions laying the basis for a durable peace; the abandon-ment of provocations or enmittee and the relaxation of tensions Détente was described in the Johnson era as "building bridges

The Russian word for detente "Tazziadka," but the term is not frequently heard in the Soviet Umon today. When used, it is understood to mean existence without illusions. ter Laqueur, the British historian, suggests that the Russian use of the term détente "refers to a process or a trend and not to state of affairs."

The most commonly used Soviet term is "peaceful coexistence," or "mir noe sosushchestvova." To Soviet theoreticiens this means a continuation of the struggle of the working class-of all the Communist parties-for the triumph of socialist ideas; it has never meant the cessation of con-.

Two Soviet theorists, I. Gisgolev and V. Larimov, wrote in notion of peaceful coexistence to ths remunciation of war. But peace and peaceful coexistence are not one and the same thing peaceful coexistence . . . does not imply even a temporary absence of war, or a breathing spell be-tween clashes." The special character of peaceful coexistence they continued arises from the fact that in principle "the Sevies Union remains in a position of permanent hostility to the ne

The present detente has produced many expressions of doubt about Soviet intentions and its probable duration. Some observers suggest that this detents may be nothing more than a Soviet taction to insure a period of 15 years in which the Societ Union can build up its industrial and military power with Western

#### A Warning

At great risk to himself and his family, Soviet scientist Angle Sakharov had advised the Wes not to help the Russians with their economic and technological problems, thus enabling them to concentrate on developing their military strength. In words which must have infuriated the Soviet

regime. Sakharov said:
"Detente has to take place will:
simultaneous liquidation of sola;
tion. Detente without democratization would be very dangerous... that would be cultivation and anonymerous of close. tion and encouragement of closed countries, where everything that happens goes unseen by foreign eyes behind a mask that hides its real face. No one should dream of having such a neighbor, and especially if this neighbor is armed to the teeth.

In snother statement he warned that if the West helped the Soviet Union to develop its miltery strength through a period of détente, "the world would be-come belpiess before this uncontrollable bureaucratic machine."

Some American observers urge that we pay the high cost of détente so that "convergence" may take place and American and Soviet institutions grow more like each other. In the end, peace would be assured because we would have two similar that when the present-day Soviet youth grows up, he will demend

such changes in his society.

Yet, the late Charles E. (Chip)
Bohlen, a close observer of the Soviet scene from 1934 until his recent death, believed it would take 30 to 50 years before coovergence could make any enpreciable change in Soviet so-

To jodge by past performance.
America will not be willing to lace the continuous struggle of wills and minds-end the neverending diplomatic-military crisis relations with the Soviet Union over such a period. And America must refuse to pay one-side costs of the detente.

We should not expect too much of the détente, but we should insist on a much better performance from American negotiators and a more equitable sharing of costs, gains and ad-

the Senate Judiciary Committee that the President had not intervened in the ITT case? To Protect President

The almost certain answer is that the two Justice Department officials were trying to protect Mr. Nixon, But from what? Judging by internal White House memos and the case of the lobbyist Dita Beard, it is hard to rule out the ITT offer of money to hold the Republican convention in San

Similarly with Mr. Nixon's defense in the milk producers case. He acknowledges important contributions from the delrymen which were brought to his attention in internal White House memos. He also admits that he met with representatives of the milk producers at the White House. on the morning of March 23, 1971. He acknowledges that on the afternoon of March 23 he ordered a like in the milk-support price which was highly favorable to the

Mr. Nixon claims this decision was also an innocent one, unconnected with the milk prodocers' campaign contributions. He asserts that he was mainly acting under pressure from Democratic congressmen who were holding a legislative gun to his head.

But if so, why did the milk producers act as though they had something to hide? Why did they move clandestinely through the dummy organizations set up under the instructions of a lawyer, Herbert Kalmbach, identified as a presidential bag man?

The defense thrown up in the ITT and milk producers cases is only the latest example of the same brazen tactic. Time after time, Mr. Nixon has acknowledged responsibilities with stories that hold together only as hedges against criminal prosecution. Thus he acknowledged that ha

played a part in trying to get the Central Intelligence Agency to cover up the original Watergate burgiary, but that it was for national security reasons. He admits that he took some fishy tax deductions for personal papers, but that it was at the suggestion of Lyndon Johnson. He also concedes that he and his secretary, Rose Mary Woods, played a part in the erasure of a critical tion of a critical tape-but that, of course, was accidental.

What all this means is that M Nixon is prepared to hang on ustil it can be proved that he is 1 crook. The country has to cept the challenge. The whole iste of Watergate now rests with what emerges from the investigation by the House Judiciary Committee considering impeachment and the inquiry and trials being brought by the Watergate special prosecution. There is no resol for anyone to flinch from the

operations. For Mr. Nixon has shown him self to be a man without a sens of shame. He doesn't care its country, or his party or the party of the party of the United States to issue a President who cannot be trust ed. Nor can it be claimed, many including this columns were wont to claim, that M. Nixon is only the latest in a jost line of imperial presidents. He has to be taken at his own value. The question he is forcing the country to answer is whether is not the first criminal prisi dent in our history.

McMURDO, Antarctica, Jan. 13 future agreements governing space and sea exploration.

At McMurdo, the main U. S. station, the flags of 17 nations tlap in the icy winds that howl across the frozen Ross Sea. A Russian meteorologist, Dr. Leonid Zhdanov is here on a one-year assignment conducting experiments with American scientists. and an American electronics physicist, Dr. Robert Flint, is assigned to the Soviet Union's Vostok station, 690 miles away.

#### A Different Feeling

"It is a different feeling in the Antarctic," Dr. Zhdanov sald recently. "I am made at home here. Even during the Mideast alert, I felt no discomfort, no

"This international community is very important, particularly if means more contact economically, because economics are what define political policies. For me, I realize a world confronta-tion is not possible. It would destroy the world."

Part of the reason for the un-troubled international cooperation is that the hostility of this continent, where entire mountain ranges are buried under nearly three miles of ice, makes men dependent on each other for survival. Perhaps more important, the effort here is scientific, and as yet nothing exploitable has been found in the Antarctic. In addition to conducting joint

scientific projects and sharing the resultant information, na-tions help each other when necessary with supplies and transportation, operate rescue missions jointly and have joint social gatherings. Two or three times a year, C-130 pilots fly a plane-load of Americans to Vostok, and there is always a party with eaviar and vodka.

#### Territorial Claims

The cornerstone of U.S. poiky here was set in 1924 when Secretary of State Charles Evans Hugbes said the United States neither claimed nor recognized sovereignty in the Antarctic. The Soylet Union also does not recognize sovereignty. But between 1920 and 1941.

seven countries asserted claims to territory in the continent as large as the United States and Mexico combined. The claims of Chile Australia and France over-lapped in one case. The U. S. base at McMurdo is on land claimed by New Zealand, and the Russian base at Mirny is in a sector claimed by Australia.
To eliminate potential friction, the 12 treaty nations agreed in 1959 to hold territorial claims m abeyance and said they recognized that it is in the interest of all mankind that Antarcuca shali continue forever to be used exclusively for peaceful purposes and shall not become the scene or object of international dis-

Unanswered Onestions The treaty however, leaves at

least two major questions un-answered: Since this is an international community, where no nation can establish its own laws whose jurisdiction applies to a civilian who commits a fclony? And in the likely event that minerals are diacovered here, to whom do they belong? If a member of the U.S. Navy committed a crime, he would be tried under the American Uniform Code of Military Justice. But, according to a military spokesman, a U. S. civilian could commit a felony and face no punishment other than to be exiled from "the Ice." There has never been a test case. Citizens of most countries, with the ex-ception of New Zealand and South Africa, are not answerable to their own national laws here. "As far as minerals go, this is the only continent on which natural resources haven't yet been recovered and this could be a problem." said Navy Capt. Alfred Powier, the military commander of U. S. operations in Antarctica.

#### Moscow Paper Assails Writers For Smuggling

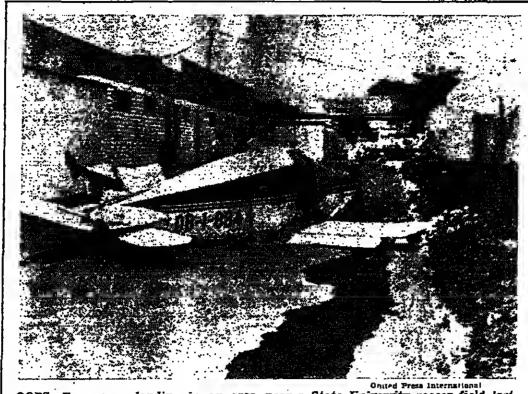

C Los Angeles Times.

MOSCOW, Jan. 13.-A Communist party newspaper sharply attacked Soviet writers and artists vesterday for trying to smuggla their works abroad and issued an implied threat that they faced official blacklisting and hence loss of artistic livelihood at home for their actions.

The attack appeared in the newspaper Sovetskaya Rossiya as the measured campaign of criticism continued against Alexander I Solzhenitzyn for his publication of "The Gulag Archipelago."

The sharpest charges were launched against Lydia Chukovskaya, a prominent 66-year-old novelist who was expelled from the Writers Union last week for having defended dissident nuclear physicist Andrei D. Sakharov last fall. Sovetskaya Rossiya accusco her of having links to an anti-Soviet emigre organization, the

People's Labor Alliance. The paper also asserted that Soviet customs agents recently thwarted an attempt by a British translator, Michael Scammel, to smuggie to the West a set of documents, including one from Miss Chukovskava authorizing payment of her Western royalties to exiled Soviet acientist Zhores Medveder. In London, Mr. Scammel denied the charge.

#### OOPS-Emergency landing in an area near a State University soccer field last week in the center of Lima, Peru. None of three persons aboard was injured.

#### Izvestia Calls

#### '73 a Good Year

MOSCOW, Jan. 13 (UPI),-Izvestia called 1973 the best year for the Soviet Union since the end of World War II. The government paper gave

these reasons last week: The depth and scale of posttive changes in the relations between Socialist and capitalist atates: the level of dipiomatic activities; the numher of bilateral and multilateral meetings treating world problems; improvement of the situation in the world's "hot points;" America'a stopping its "shameful aggression" in Vletnam; the appearance of prerequisites for peace in the Middle East: an improved political atmosphere in Europe, including the start of talks on reducing troops and

also cited completion of the first stage of the European Security Conference and new Soviet-Amencan agreements as reasons why 1973 was a good year.

TOKYO-Japan, with the rest of the world, has been suffering in recent months in the wake of the oil squeeze and onrushing inflation. Despite these unfavorable conditions, however, there is no doubt that the Japanese economy continues to grow on a firm basis.

As a matter of fact, up to the recent oil crisis, brisk economic activity had been reflected in the trend of business. The Bank of Japan note issues have been increasing at a rapid rate. while businesses held strong positions of liquidity.

Investments in new plants and equipment have remained strong. Interest rates have edged upward. While certain dampening monetary restraints have been seen, considerable time is expected to be required before they can be felt in the general economic activity.

The oil crisis and inflation will undoubtedly bite into the economy. On the other hand, these unfavorable factors cannot be expected to halt Japan's continued economic expansion. In fields other than oil and related products, production continues to gain further momentum, while the consumption demand is growing vigorously.

As a matter of fact, the unfavorable factors mentioned above may eventually prove to have a favorable effect on the economy, in view of the fact that the tendency has been toward "over-heating." Both the government and private industry have been moving positively toward curbing the ouslaught of inflation. A big factor has been the postponement of government spending.

With the settlement of the oil issue, Jopan's balance of payments will undoubtedly remain in deficit, as greater dependence on imports of prices have already been drastically hiked, will keep lapanese imports at a high

Long-term capital outflows will show further increases in keeping with the growth of direct investment abroad.

According to Japanese bonks, much is being expected on the domestic price front of vigorous anti-inflation measures centered in monetary tightening. Price advances in Japan, to a large measure, reflect the trend of world inflation, as well as of . excessive domestic demond.

Japanese imports grew by a sizable 70 percent during the mid-year term of 1973, compared to the same period of the previous year. Japanese exports, on the other hand, expanded much less rapidly in volume, naturally reflect-

resources like oil, whose ing devaluation of the yen on a floating basis. Particularly significant ad-

> vonces into overseon mor-Japanese banks and securities firms. Japan's four major securities companies have been very aggressive in going multinational. Their push overseas is expected to become more active in the field of merchant banking business. Such leading securities firms as Daiwa, Nikko,

traditional business of selling Japanese securities and finding clients who want to iskets have been made by sue corporate debentures and bonds in Japan.

An epoch-making development in the securities business of Japan during December, last year, was the listing of foreign stocks on the Tokyo Stock Exchange. Mojor securities companies believe that the event has provided a good chance to gain closer access to foreign companies. One brokerage representative declared: "By underwriting foreign stocks in Tokyo, we will be able to have closer relations with the issuers, most of which are multinational companies. Taking advantage of the relations, we intend to finance multinational firms in the

The way for the listing of foreign issues in Japan was paved by the leading securities firms of Japan. The first six foreign stocks to be listed on the Tokyo Stock Exchange include Dow Chemical, First National City Corp., First Chicago Corp., Compagnie Financière de Paris et des Pays-Bas (Paribas), IU International Corp., and General Telephone & Electronics. More than 2,000 shareholders were gained as subscribers for each issue

even before the actual listing. Meanwhile, Japanese banks are moving to establish their positions overseas by setting up branches, joint ventures, subsidiaries and affiliates. A strong step has been taken toward active participation in international financing, in which banks must inevitably lead the way.

Fuji Bank has gone international. With offices in all of the world's major financial centers.

# We're shooting for better routing.

Moving raw materials and cargo efficiently is more important today than ever before. That's why "K" Line is opening new routes and improving shipping services wherever possible.

In Europe, for example, we're conducting regular liner service on the Japan-Europe route. We're also conducting tramper, ore carrier, car carrier and tanker services.

Making things happen through joint ventures and other forms of international cooperation is part of our progressive business philosophy. We've also made pioneer efforts in containerization and door-to-door service, in the improvement of container terminal operations and loading/unloading facilities.

In the spirit of international cooperation, "K" Line is getting together with firms around the world. And we'd like to get together with you.

# Nikko Securities Sponsored **GT&E Listing** on the Tokyo Big Board

General Telephone & Electronics Corp. got a new foothold in Japan.

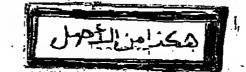

The firm was listed on the Tokyo Stock Exchange, and Nikko Securities was the sponsor.

GT&E stocks will now be traded on the Tokyo Exchange and the same new fund-raising possibilities, as well as exchange-related publicity, will be available to more and more overseas firms in the future. Nikko Securities is ready with the know-how to smooth the way for your listing, too. Helping overseas firms onto the Tokyo Exchange is only one of our many international services.

Nikko Securities. Drop us a line; we'll put more than a half-century of dependability and experience to work

# CAPTIVATING

Not in this day and age ... That is unless you're an antique car buff, or one of those who has a nostalgia for the good old days. Yet 40 years ago when this beauty made her debut, she really turned some heads. In fact her impact on the country at the time was so great that the name DATSUN became synonymous with AUTOMOBILE in the Japanese language for decades to follow.

She was the first in a long line of curvy beanties which have enthralled the generations of drivers since.

The Datsun's of today, ever sleeker, ever more reliable are receiving the same ecstatic reception that their predecessor got back in 1933... Only this time on a global scale.

# The Nomura Securities Co., Ltd.

Report by Mr. Kiichiro Kitaura, President, for the year ended September 30, 1973.

To Our Shareholders and Customers:

We are very pleased to report that Nomura's performance in fiscal 1973 was the best in its history.

Earnings amounted to \$120 million on operating revenues of \$509 million. These earnings give ¥54 per share of common stock, which has a par value of ¥50. Our sustained efforts to strengthen and stabilize our business operations, both quantitatively and qualitatively, were responsible for the earnings increase for the sixth consecutive year.

Our long-range development program addresses itself to expansion of our international network. Such global expansion will insure growth of the scale, quality and diversification of our overseas operation and services for investors.

We sold \$291 million (¥77.2 billion) worth of foreign stocks and bonds during the year, for a staggering 50% of the total sales of such securities in Japan. An important achievement was sale to our domestic customers of foreign investment trusts: Fundamerica (established jointly with Merrill Lynch), Keystone S-4, and Fundeurope (its management company was established in cooperation with Societe Generale and Deutsche Bank).

Nomura also managed, among others, a ¥10 billion yen-denominated bond issue for the Mexican Government. We are now helping Dow Chemical end other world enterprises to list their stock on the Tokyo Stock Exchange. In April, our stock was admitted to the list on the Amsterdam Stock Exchange.

The program also is directed toward increasing the number of our customers under the cumulative investment plans, such as the Employee-Asset-Building Plan and the Employee Stock Ownership Plan. The number of individual clients participating in these plans reached 590,000 and 500,000, respectively. And there were 2,160,000 accounts under all of Nomura's cumulative investment plans at theend of the fiscal year. This is indeed e significant accomplishment, especially at a time when ownership of stocks by individual investors has been declining.

Looking ahead, what with the oil crisis and the roaring worldwide inflation, we see difficulties in the coming year. But we will continue to do our best to improve our performance and to serve the interests of our customers to the greatest extent possible.

### "K" Line Cargo Service to Europe

(Continued from Page 7) Since then, close relations have been maintained between the two companies. With the advent of the container age on the Far East/-Europe route and vice-versa, however, it became necessary for "K" Line to assign full container-ship service.

In accordance with the advancement and promotion of containerization on the route, British, German and Japanese member-lines of FEFC formed the Trio Group, while Dutch and Scandinavian member-lines (Norway, Sweden and Denmark) established the Scandutch Group.

These two groups now wield the greatest influence in FEFC. In view of this movement within the conference. 'K" Line has been faced with the need to cope with the trend toward greater containerization. But for various historical reasons, a clearcut

Facing the urgent demand

of the day, however, the time had come when it was no longer possible to ignore the rapid tempo of containerization on the route.

In accord with these objective circumstances, negotiations were corried out with the A.P. Moller Maersk Line and with the other memberlines of the conference on how to realize "K" Line policy.

"K" Line announced that it could finally accuire an independent membership in the conference as the Japanese flag-carrier, from the beginning of 1974, by means of amicable dissolution of its partnership with the A.P. Moler Moersk Line.

In realizing its independent membership in FEFC. "K" Line is grateful to have received strong support from the Ministry of Transport of

Japan, two other Japanese and collecture member-lines and many other parties concerned.

> "K" Line's High-Speed, Multi-Purpose Cargo Liner M.S. "Scotland Maru" Placed on New Route from Janucry, 1974.

The M.S. "Scotland Maru" was completed in 1970 as one of high-speed cargo liners to be placed on the European route. Its sister ships are the M.S. "England Maru" and M.S. "Wales Maru."

It is a large size (12,214 D/W tons), high output (21.5knot cruising speed with full load) ship of the semi-cit type. In addition to a three-tier hatch, the vessel is equipped with high-efficiency loading devices, such as an 80-ton Stulken most and 15-ton derrick crane. The ship is a multi-purpose one able to load heavy cargo, refrigerated cargo, pailet cargo and

# JAPAN & EUROPE

### Japanese Securities Houses in Europe

The following article was written by Mr. Ralph-Frankin Calatchi and Mr. Toshio Mori of the

Nikko Securities Paris Office. Since the latter half of the 1960's, Japan has positively pushed its trade and capital liberalization on the strength of its persistent payment surplus. This move was initiated by a marked advance abroad of Japanese firms including trading houses. In general, Japanese banks have followed suit, diversifying their business and consequently diversifying their ways of raising funds and employing them. In that way, the background of the expansion of Japanese financial houses overseas was the consequence of the exponsion of Japanese enterprises.

Second to America, the next biggest concentration of Impanese financial institutions Investment Bank Notes Issue is in London. However, in London it is not trading financing, but the Euro markets which constitute the fundamentals. In the last 3 years, because they were cash rich, the most important aspect of Japanese financial business has been the increase in Euro market lending. The Japanese had a highly competitive attitude to such lending by effectively offering borrowers better terms than non-Japanese competitors were prepared to give. Concerning Ignomese securities houses, they were able to arrange approximately 50 private placements

arranged by Nikko and Kuhn, Loeb.

In the beginning, the Japanese Ministry of Finance took the position of encouraging the Japanese securities houses to merge into all Japanese groupings in an effort not to lose control of them. The drawback of this position was that it tended to isolate the Japanese financial houses from the international community, and since 1972 Japanese financial houses have been allowed to participate in existing multi-national consortia. Mitsubishi joined Orion, Sumitomo went into the Société of foreign bonds in Japan Financiere Européenne, and

since this activity began in other banks, such as Roths-July 1972 with the European child Intercontinental Bank and Western American Bank Europe, took in Japanese portners.

In Japan, banks and bro-. kerage houses are segregated, but abroad no such restrictions operate and consequently banks have been developing specific vehicles to offer investment banking services often in competition with securities houses. Occasionally banks, such as Sonwa with Nomura Securities, have set up a joint Japanese overseas operation. but more frequently it has been with a Western partner, such as Sumitomo with White Weld. On the other hand, Japanese securities houses sought diversification

of the services they offered emd created Europe-based investment research on advisory companies such a the Nikko-Worburg Invest ment Services.

While most Japanese securities houses were busy mising debt for prestigious En ropean issuers, some more sophisticated Japanese houses were also actively developing the equity side During the last days of 1972 for the first time in its h nancial history, Japan od mitted foreign stocks for quotation on the Tokyo Stock Exchange. To date, among possible European candidates, only one French financicl institution is quoted while Nikko is introducing Companie Française de Petroles, which will become the first European industrial corporation to be listed in 1974 on the Tokyo Stock Fr.

One problem that ought to be mentioned is that such rapid expansion has pointed out the lack of experienced staff. Staff traditionally vers ed in paper work of international trading and commercial banking was not al ways equipped for its new role in international finance This difficulty may give partial explanation for one tionale to the Japanese Western joint financial ven tures. In this fashion, japa nese financial houses have been able to expand into new markets while economiz ing on scorce staff resources. To this extent, the joint ven ture course of action can b viewed as a useful temporar solution until lapanese secu rities houses systematically build up top caliber inter national departments. In a dition, this course of actic also helps to minimize resent ment among local financial communities. In this cornec; tion, with regard to invest ing in European securities, several ventures have been created in Europe, such as the "Europe Growth Fund" by Nikko, Suez and Save and Prosper, the "Fund Europe" by Nomura, Deutsche Bank and Société Générale

The world oil crisis has destroyed Japan's hope to rapid growth in 1974 and th balance of payments ha moved into deficit at a muzi greater speed than was at ginally desired. Long-term capital outflows totaled a proximately U.S. 9 billion de lors in 1973 compared to a proximately U.S. 4 billion 1972. The capital outflow has been caused both by in rush of Japanese banks lend abroad as they were couraged by the Japanes Ministry of Finance and b Bank of Japan. The Japanes have also been investing in more heavily outside that own country than at any in in postwar history.

Both Mr. Rolph-Frontin Calatchi and Mr. Toshi Mori, Manager of the Part office, believe that the ne freedom of Japanese entities to borrow abroad may no! b completely reclized with European market forces Europe, lenders will probabi not be able to fully satisfy the financial needs of Japanes borrowers resulting liberalization. Japanese nancial houses and the clients are therefore locks toward the U.S. capital Fil kets. Because the U.S. of international markets probably witness a subst tical increase in the numb of borrowers, it appears to Japanese financial house may have a good chance facing one of their hards challenges during the VE 1974. On the other hand Japanese corporations' exte nai borrowings may we prove to be the best survivo chance for Japanese sec. rities houses in 1974.

# THE TAIYO KOBE BANK.

One of the world's largest banks Formed by a merger of Bank of Kobe and Taiyo Bank October 1, 1973

> TAIYO KOBE BANK is prepared to help you in every way that a bank can help. We have an enormous wealth of experience in banking matters. Experience in scope, and experience in depth. Most important, we have a fresh, ambitious start. A youthful attitude. And a desire to help all of our customers, old and new. We give you more than a new name. We give you more than a new bank. We give you a better way to do international business.

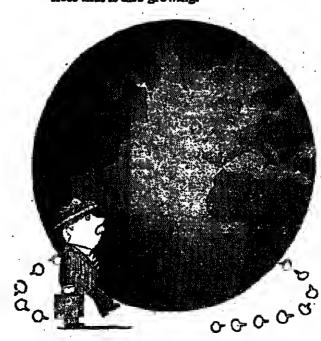

# The Sumitomo Bank is growing CONSOLIDATED BALANCE SHEET March 31, 1973

As of March 31, 1973, the record shows that our deposits grew. To 4,908,052 million ven (U.S.\$18.458 million), 25.0% over deposits the year before.

Our loans grew. To 4,028,705 million yen (U.S.\$15,151 million), 26.5% over loans the year before.

And our rank grew. To place us among the world's ten largest banks in terms of deposits.

We translate this growth into complete international banking and financing services, including information on markets worldwide, through a network of branch offices, affiliates, and representative offices that is also growing.

becomes available, activity should boom.

The Japanese and French authorities, who had blocked the international market to their residents when the balance of payments was so strong that no additional inflows could be tolerated, have now relaxed their controls and the German government is expected to do so early this week.

The Japanese are eager to borrow in deutsche marks on the theory that the yen and the DM will move more or less in tandem against the dollar thereby minimizing their foreign exchange risk.

However, secondary-market prices for DM Eurobonds have yields of around 10 percent, which means it is unlikely that the Japanese will try to revive that new-issue market in the very near future. Pioneer Electric Corp., however, announc-ed Friday in Tokyo that it plans to float a \$10-million, 15-year convertible later this year after receiving shareholder approval at a meeting scheduled for March.

It is unlikely, however, that Japanese borrowers will come to the international market before April because the cabinet approved on Friday a plan to suspend the 10 percent withholding tax on the interest payments for bonds issued abroad as of April 1. Parliament is expected to approve the plan later this month and without the exemption there is not likely to be much enthusiasm for such bonds:

Of course, Japanese borrowers could float bonds through offshore financial subsidiaries—as did the Bank of Tokyo late last year. But it is questionable whether they will go to that additional expense when the two-

economic issues is becoming more

vided government by reaction, rather than action, planning and foresight in tackling many economic matters. Economists, businessmen and labor leaders have been talking in that vein. And, periodically, the financial markets have been saying the same thing. The latest round of depression to the stock and bond markets reflects

widespread investor pessimism over many economic problems and concern over the inept handling of them in the nation's The sharp drop in the stock market last week (more than 38 points in the Dow Jones industrial average) is vivid testimony

#### continuing high level of interest Significant Change

While the recent flow of data on the performance of the American economy has remained mostly encouraging, there has been no undertone in the figures to suggest that the worrisome near-term outlook has changed signifleantly from earlier cantionary assessments. The lag in the num-bers may be masking some highly disturbing coming events-and

blissfully oblivious of the gather-

The energy crisis has been

capturing the headlines and public discussion-deservedly so. The international currency litters related to it have also come in for a major share of attention. But the real threat to economic stability has been the rising and escalating pressure of inflation, which has been accorded far and

away too little attention. The major arms of government may be making the same mistake of complacency they made e year ago in grossly underestimating the dimension of inflationary

It was at this time in 1973 that top officials in Washington were confidently proclaiming that in-

was busy justifying the sudden shift to a less rigid Phase-3 of the economic stabilization pro-

ing the year.

gram as the proper formula obtain prosperity with reasonably stable prices" and was express-ing confidence that prices at the end of 1973 would be no higher than they were then after a "Dow-like" performance during

rise only 21/2 percent or so dur-

the year. However, the bow sprung, and prices surged upward. The financial world was joited last week when the government's monthly report on wholesole

prices showed a jump of 2.2 per-

a series that had crawled-for-ward and backward-by only a Secretary of the Treasury few tenihs of a percentage point George P. Sbultz at that time each month and its sensitive industrial commodity component had had virtually no change for 10 years.

flation would soon be receding cent for the single month of

and that the price level would December, Before its meteoric rise

In the full year of 1973, however, the operall wholesale index shot up 18 percent. The greatest influence in that thrust was the 65 percent spurt in fuel, most of it in the lest three months. The

of the last two years, this was

percent rise in food costs was another major contributor as was the earlier rise in lumber. Worse Price News

Now, the sad prospect is that even worse price news lies ahead. The recent doubling of world oil prices (which look place after the government's December wholesaic price survey! and the con-Unuing shortage of fuel in the United States assure the unhappy likelihood, according to the Manufacturers Hanover Trust Co., that "fuel prices will climb at least as streply as they have in the last three months—an annual rate of beffer than 150 percent.\*

Moreover, food prices, which had been declining in the three previous months, resumed their upturn in December with a rise of 1.4 percent. That trend is expected to accelerate because of lagging beef and pork production, as well as the low supplies of wheat, the smallest in 25 years.

Ali of this presages much higher consumer prices in the months alread, although not necessarily to the full extent of the spurt in wholesale prices. Technology and productivity tend to mitigate the extent of the pass-through to consumers. But productivity has flettened and may now be headed downward

### **Eurobonds**

(Continued From Page 9) now have been using the international market to bolster the balance of payments by artificially inducing inflows of capital, are expected to continue to be heavy borrowers.

Larger Issues Off

Currently, British Steel Corp. is seeking \$35 million through a 15-year bond issue which is expected to carry a coupon of 8 5.8 percent. Thoughts about two larger issues apparently were abandoned when soundings of the market indicated that that would be too big a chunk,

As it is, with the economic crists at home, it will be difficult enough for a U.K. borrower to attract investor interest. In order to overcome some of this resistance, the Bank of England, which administers the queue of borrowers waiting to tap the market, reportedly advanced British Steel over Coventry and the Greater London Council since British Steel is guaranteed by the government and the local authorities are not.

The National Cos1 Board's 8 5.8s are currently quoted at 98 1/3 bid, 99 1/2 asked, indicating that under present conditions British Steel would no doubt be issued at a discount. Another state-guaranteed loan

is the \$15-million issue for the Finnish Municipalities, which is expected to carry a coupon of 8 3/4 percent and an issue price below par. On the lower end of the cou-

pon scale is a \$25-million offering for Eurofima, expected to pay 8 1 2 percent, A subscription price of 96 1/2 is anticipated. Also on offer is a \$25-million loan for American Motors. This has created some surprise since it had been assumed that U.S. firms would not be borrowing here—where costs generally are higher than in the United States -now. that U.S. controls on capital outflows are clearly scheduled to be lifted by the end

#### of the year. Red-Tape Aspect

Managers of the issue say AMC is eager to get the money as soon as possible and that the absence of red tape favors the Eurobond market, However, it is also assumed that AMC could not borrow on as favorable terms-expected with a 9 percent coupon-at home.

Assessing this is somewhat diffiguit as AMC does not bave any long-term deht outstanding and has no credit rating. Bankers guess an appropriate credit rating somewhere between BB and BAA. Given the weakened state of the U.S. bond market and the heavy calendar, it is widely as-sumed that a coupon of over 9 percent would have been need-

Also on schedule, pending government approval, is a 15-million Unit of Account loan for Portugal's Autostrada.

# More Tests Sought for A Key Drug

Controversial DMSO Stirs Interest in U.S.

> By Lawrence K. Altman NEW YORK, Jan. 13 (NYT) .-One of the most mysterious and controversial drugs known, DMSO, is leading some doctors to urge their colleagues to undertake detailed experiments to determine the full range of its potential benefits to patients,

DMSO, which stands for dime-thyl sulfoxide, is prepared as an inexpensive byproduct of the processing that produces newsprint. The drug was discovered more than a century ago, but its potential applications to medicine were not appreciated until 1962 when doctors began to realize that perhaps no other drug known has a broader spectrum of pharmacotogic actions than those elaimed for DMSO in plants animals and humans DMSO affects the membranes, or outer linings, of most living cells. But its precise mechanism of action is

not known. DMSO has been hailed for its allegedly startling powers in help-ing to provide rapid relief for cold sores, ankle sprains, bursitis, shingles, skin ulcers and a vast array of other common and rare conditions. But these claims have stirred a controversy over the last decade. And the Food and Drug Administration, acting on reports of eye changes in animals, bas clamped down on its testing in

Officials Cautious At a three-day international scientific meeting here, cautious FDA officials said that further tests had satisfied them about DMSO's apparently low toxicity and that the agency was collect-ing evidence so that if DMSO is licensed for prescription use on humans, the family doctor can prescribe it without fear of malpractice suits.

To this end, Dr. K. C. Pani, an FDA official, said that his office was encouraging doctors to submit properly designed protocola-the clinician's blueprint—to evaluate DMSO's efficacy. Licenses have been granted to 13 doctors to test DMSO on humans according to rigid agency-approved protocols, Dr. Pani said.

Conference participants pointed to a report by Dr. Jack de la Torre and his University of Chi-cago colleagues as the highlight of the meeting. Dr. de la Torre reported that intravenous injections of DMSO just after a severo brain or spinal cord injury in monkeys or dogs could significant-ly improve or.-in some cases, reverse the process of paralysis that generally results in such situations.

DMSO dramatically lowered the abnormally high pressure that can build up within the skull after central nervous system injuries, Dr. de la Torre said. Aithough Dr. de la Torre could not offer an explanation, he said his group found "DMSO clearly superior" to no treatment and

generally more effective than the conventional therapies. He said his group would be prepared to test DMSO his such injuries in humans once approval from the FDA was received.

#### Federal Studies See Shortage of Doctors in U.S.

WASHINGTON, Jan. 13 (NYT). Despite a recent prediction by the Nixon administration's top medical officer that the nation may be close to having a surplus of doctors, unpublished federal studies estimate the curent shortage at 30 000 physicians. The studies made by the Na-

tional Institutes of Health in-dicate that, even if eyer larger numbers of doctors are licensed. it will be about a dozen years before a balance is struck between the supply of physicians and the

Further, the studies estimate a steady rise in the number of practicing physicians who are graduates of foreign medical schools. As many as 164,000 may be working in the United States by 1990, more than double the current total the studies project.
Two months ago, Dr. Charles C. Edwards, assistant secretary for bealth for the department of Health, Education and Welfare, sald in a speech: I think that clearly we have moved beyond the point at which concerns about a shortage of physicians were genuine, if somewhat exaggerated. Even more significant is the posaibility we may well be facing a doctor surptus in this coup-

#### SALT Talks Resuming At End of the Month

GENEVA. Jan. 13 (UP1:.-The United States and the Soviet Union will resume their Strategic Arms Limitation Talks at the end of this month, Western diplomats

The present second round of talks began Nov. 21, 1972, and there were 50 meetings before the talks adjourned on Nov. 16.

New Guinea Soldiers Riot PORT MORESBY, New Guinea Jan. 13 (Reuters).-About 100 Papua-New Gulnea soldiers rioted outside their barracks Friday, hurling stones and bottles at possing cars. The cause of the riot was not immediately known.

### **SPORTS**

# Sprinter Is Off to a Quick Start

of the indoor 60-yard dash, got the Knights of Columbus track and field meet off to a speedy start last night by holding off Steve Williams for the second straight night.

Washington clocked 6.1 seconds to beat Williams, the current Ama-teur Athletic Union 100 and 220yard dash champion. On Priday night, Washington took advantage of his quick start to edge Wil-liams in the Catholic Youth Organization meet in College Park,

High-stepping Larry Shipp of Louisians State, a former AAU national junior champion, edged teammate Allen Misher in the finat of the 60-yard high hurdes. Shipp who lost this event in the CYO meet to world record-holder Rod Milburn, was timed in 72 last night at the Nassau Coliseum. Milburn was not entered in the K of C meet but tied his world indoor record of 6.3 on Fri-

Former Villanova distance star vic Bucrkle, fresh from a stunning two-mile upset over Steve Preiontaine, bettered his previous best for the mile by more than a half-minute. Buerkle, who runa with his bead clean-shaven, took the lead for good with more than a half mile to go and was never pressed in beating Barry Brown of Florida. His time was 4:00.3; his previous best was 4:32.

High jumper Dwight Stones and two-miler John Hartnets both set meet records in their specialties. Stones, who holds the world

### Rangers' Francis Is Coach Again

NEW YORK, Jan, 13 (AP),-General manager Emilie Prancis resumed coaching the New York Rangers Friday, vowing to cruck down on the team that has stumbled through the National Hockey League season.

In a terse, two-paragraph state. ment, the Rangers announced that Francis would return as the club's coach immediately, replacing Larry Popein. New York Is now fourth in the East. Francis was the Rangers' coach

#### The Scoreboard

BOXINO—At Madrid, Jose Anionia Jimenet. 21. of Spain, retained his European leatherweight lifts by outpountion Preserts Caniel Vermandere, 30. a Candes traffic policeman. The 15-round bott was held at the Sports Palace before a crowd of 8.000 which reared approval when Referrer Tex Exister of Luzembourg raised the Spanish champlon's gray.

Al San Hiego, third-ranked feather, weight Art Harley of Mora Scotta scored his 23d straight victory with a onanimous decision over Jose Olivares of Mexico City in a Irea-swinging to-round 19th Hafer, 126 pounds, pressed lise fight of the way but warn't where I floor the 127 1-2 pound Olivares, who carried him to a decision for the librid time to their three meelings. He's the only fighter to avoid a knockout in Hafer's last 15 houls. Auto Racton Gray if the way but warn't will be according of the Taxman series in a Chevron B24 at the Pukekobe Cincuit, John McCormack of American in a Bert Mira, was second and Dovid Oxion of New Zealand took third in a Gerston B24 and Max Stewart of Australia in a Chevron B24 and Max Stewart of Australia in a Chevron B24 and Max Stewart of Australia in a Chevron B24 and Max Stewart of Australia in a Chevron B24 and Max Stewart of Tedrity Nino in the lare with a formula one victory, won easily after moving to 100 trion when early leader Graham Merac of New Zealand dropped out on the 32d lap with engine trouble.

ALCINE SKING—Al Oceralaufen, West Germany, Austrians took the lirs: three places in a women'd giant station for the European Cup. Gray Ruber: 15. covered the 1.220-meter course in 1.221. CHELLSTERP/BLACK

LATE AT

WEINSTEIN/WHITE

Position after 19 NxKBP

B-02; 12 Q-B3; O-O; 13 N-B6, BxN; 14 QxB, which lets White recover his pawn with

White recover his pawn with the slightly better pawn formation. However, Chellstorp could not continue with 14. B-N2 (14. P-B3; 15 NxBP!, because of 15 N-B5, B-Q1; 16 QR-Q1; P-B3; 17 NxRP, giving White a great advantage in development and mobility. Still, he might have plunged into 14. P-B4, for after 15 RxB!, QxR; 16 NxQP, Q-Q3!, it is not clear how White could have secured the advantage.

After Weinstein's 15 R-K5', Chellstorp's 15 B-Q3, yielding two minor pieces for a rook, was futile, Weinstein simply ignored 17 P-KB3 by playing 18 NxQP, breaking out of Chellstorp's pin 18 B-N2 by means of his smashing 19 NxKBP.

Ready for Anything

Weinstein was ready to meet 19... QxN? by the annihilating 20 Q-R5!, while 19... PxN would have fared no better after 20 BxPch, Q-N2 (21... K-N1??; 22 N-B5! with a quick mate), siving White a winning code.

giving White a winning end-

ing. Chellstorp recovered two

pieces for rook and pawn with his moves 21 and 22,

but the resulting position was

quite hopeless for him despite the bishops of opposite color. He could not play 23 QxP? because of 24 Q-K71 and, after Weinstein's 27

secured the advantage.

"Theoretical! A synonym for unoriginal! How can anyone who follows a book theory closely think of stronger and more original moves?"—thus Tchigorin railed against Steinitz's heavy emphasis on positional raley.

positional play.

Their lifelong dispute was as much a battle of egos as a clash of opposing concepts of play. Stemitz was wont to identify his personality with his theory and his theory in his theory and his theory, in turn, with the game itself, while Tchigorin preferred to regard himself as the noble savage, exempt from all rules-and precepts.

Tchigorin felt that theory was constricting, blunting the power to create brilliant, unique combinations.

What Tchigorin failed to what Ichigorm laned to grasp was that theory is to be used, often creatively, and that only when it is allowed to become stale can it stand in the way of fresh thinking. After all, it was the theoretician Steinitz who played the most dazzling combination (in game 4) of their 1892 world championship match, and it was Steinitz who won, 121/2-101/2.

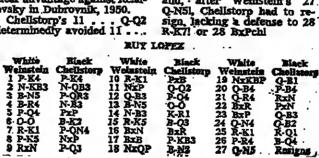

Many A Slip . . .

However, in assessing the talent of a young player, it is tactics and combinations that provide the more reliable index, since his possession of theoretical knowledge may mark him as merely an ex-cellent student. Thus, for his sharp tactical play, Norman Weinstein, the 23-year-old winner of the recent Chicago Ioternational Tournamieot, must be ranked as the most formidable of the current crop of young Turks.

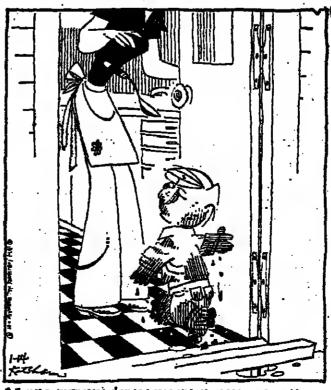

In his game with Craig Chellstorp, from the Chicago tourney, Weinstein clearly tourney, Weinste showed his stuff.

With the rarely played 5 P-Q4, Weinstein sought an open game and with 10 R-KI, he avoided the pitfall 10 R-N5?, PxB; 11 RxP, N-R4; which gave Euwe (Black) a clear advantage against Resh-evsky in Dubrovnik, 1950.

Chellstorp's 11 Q-Q2 determinedly avoided 11

OBEDIENCE TO AUTHORITY: An Experimental View By Stanley Milgram; Illustrated. Harper & Row. 224 pp. \$10.

#### Reviewed by Christopher Lehmann-Haupt

Stanley Milgram contends in his \*Obedience to Authority: An Experimental View," then we must stop sneering at bureaucrats who insist that they are only "follow-ing orders." We need no longer wonder why a pleasant-seeming fellow like 1st Lt. William L. Calley jr. slaughtered those civilians at My Lai We can stop probing for the monster in Adolf Eichmann and finally accept Hannah Arendt's contention that in Elchmann's case the evil was banal. We can understand Nazi Germany, Vietnam, Andersonville, Alexander Solzhenitsyn's "Gulag Archipelago" and all the other historical instances where ordinary people have acted in-humanely without provocation commensurate to their deeds. And we can pretty much throw in the towel on the future of civilization in a world where there are peck-ing orders, assembly lines and death by remote control.

For Stanley Milgram has gone into the laboratory and discovered an appalling fact about people—that most of us would rather follow orders than obey our humanitarian instincts. In a diabolically clever experiment he designed a decade or so ago at designed a decade or so ago at Yale University, Prof. Milgram invited his subjects to teach invited his subjects to teach random word pairs by delivering a series of increasingly powerful electric shocks for every wrong answer given by the "victim." To his astonishment more than 60 percent of his subjects compiled, even though the "shocks" (which were of course fake) ranged up to 450 volts and were designated to the subjects as "dangerously severe," and even though the "victim" (who was of course a trained actor) would begin protrained actor) would begin pro-testing pain at 150 voits and would be acreaming in agony and begging to be released from the experiment from the 300-volt level on up.

Whatever it took to resist the schedule of "prods" delivered by the "experimenter" ("The experiment requires that you continue!" and so on) and to break the terms of the experiment the majority of subjects were unable to marshal inner resources, even when they were feeling severe an-xiety over what they found them-selves doing. The authority of "science" (or whatever) was simply too imposing to dely, the temptation to nede responsibility too strong. And so, after fidding with all the variables and constructing theoretical models, Prof.

CO the awful truth threatens Milgram was forced to conclude to dawn and if we can be-lieve what the social psychologist report, that "a substantial proreport, that "a substantial pro-portion of people do what they are told to do, irrespective of the content of the act and without limitations of conscience, so long as they perceive that the com-mand comes from a legitimate authority." And: "This is a fatal flaw nature has designed into us, and which gives our species only a modest chance of sur-vival." Read it and weep... if

yoo can believe him.

But can you believe him? To some extent yes. Certainly the experiment itself seems soundmore so than the foreguing sketchy description may convey. For Prof. Milgram kept altering its basic scenario until all the unknown variables were pinned down. Thus he established, for instance, that men and women behave the same, and that the opportunity to vent aggression was not the motive behind the subjects' behavior. And by his careful sifting of the evidence, he dispels any doobts we may have that the subjects really believed "they were administering painful shocks to the learner," or that it is reasonable to generalize from the "laboratory situation" to "a general view of obedience in wider social life." Moreover, in an appendix Prof. Milgram scores winning points over those who have argued that the experiment was too cruel to have been under taken in the first place.

No, nothing seems wrong with the experiment itself or with the conclusion that some people in wider social life" are depressingly obedient to authority. The trouble with this book lies elsewhere. Part of it lies in Prof. Milgram's claim that "the people studied in the experiment [were] representative of the general population" and not "a special group." For n seems parrow-minded to describe as representative of all human-kind a group of people, most of whom participated in the experiment out of a curiosity about "science" and for a fee of \$4 plus carfare.

But the biggest share of the trouble lies in Prof. Milgram's astonishing leap to apocalyptic pessimism over the future of humanity. True, it is disturbing that 60 percent of his subjects obeyed; and his speculations on why they did so are interesting. But it seems far more significant that as much as 40 percent of 1.3 so-called "ordinary people" di-obeyed; and his failure to exp'or: this fact further is most curiou. If 40 out of 100 "ordinary perple" were able to overcome whit Prof. Milgram judges to be a fatel flaw nature has designed into us," then the chances for our species' survival seem a good deal better than "modest." And what Prof. Milgram ought to be exploring—and constructing threoretical models to explain—is not why the majority of people are blindly obedient (if indeed they are), but why the minority is heroically disobedient.

Mr. Lehmann-Haupt is & New York Times book reviewer.

# Several Super Things Happened Before Game

By Dave Anderson

HOUSTON, Jan. 13 (NYT).— game on TV, three Skylab Surrounded by a red curtain, a astronauts whirled in space. Surrounded by a red curtain, a dozen prize beef cattle were standing in etraw, their rumps resembling an affensive line poised for a play. On the sawdust floor of the Astrodome, 25 bartenders were pouring drinks. Smoke drifted from two fires where a dressed beef and a whole pig were being barbecued. At the buffet tables, beef, pork, baked beans and Mexican delicacies were avallable. Soothing the heart, as well as the heartburn, was the voice of Charley Pride, the country singer. Just a little Texas Hoedown," as the invitation read, tossed by Pete Rozelle and his bride Carolyn as a prelude

to the Super Bowl game. Exactly 2.838 guests materialized for the National Football night for its club executives, dignitaries, media and other assorted visitors to the first Super Bowl in the alleged grest state of Texas. Just about everybody showed except the competing players. Confined by their team curfews. they might as well have been in

Huntsville State Prison up the road a plece. party," said Billy Sullivan, tha president of the New England Patriots, "than we used to have

at our games." The Super Bowl isn't mercly a game. It's a week-long hap-pening, a pro football convention, a chunk of Americana to go with the Kentucky Dedby, the Indianapolis 500 and the Masters golf tournament. The attraction of those three events is that each is in the same location each year. The site of the Super Bowl changes hut, unlike the World Series, the site is known two years ahead. People can plan for it. Of the 72,000 spectators at today's game, about 50,000 arc visl-

tors who arranged to arrive long hefore the Miami Dolphins and the Minnesota Vikings did. Used to a Loser

The people here don't seem too excited. But that's understandable. Their team, the Oilers, had un energy crisis long hefore the nation did. The Oilers have won two games in two seasous. The other day a lady with a Texas twang turned to her son, perhaps

"You wanns go to the game?" "Nah." the boy said. "I like baseball."

After supporting two Super Bowl losers, Richard Nixon is not making a pick this year. He lost with the Dolphins two years ago and with the Washington Redskins last year. Operation Candor couldn't risk the candor of being a three-time loser.

For three hours today, the

Super Bowl game was more

important to most of the nation than, say, the energy crisis or the space program. That's the nature of the American mentality. The gas shortage isn't obvious here, which confirms the suspicion of some visitors that Texas isn't really part of the United States anyway. Here you simply

drive in and fill it up. No lines. No gouging. The price has remained under 40 cents a gallon. "Super Bowl's more important to me than gas." a taxi driver was saying. "Super Bowl means money to me this weekend. I can always get gas." While millions watched the

Griffith vs. Licata

BOSTON, Jan. 13 (UPI).— Former world middleweight and welterweight champlon Emila Griffith will meet Joe Licate in a 12-round bout Feb. 5 at Boston Garden, promoters have said.

# They've been up there for

several weeks and they'll be up there for a few more. But only a their names. Ask almost anybody to name three Dolphins or three Vikings and it's easy. Csonka, Griese and Buoniconti, Tarkenton, Page and Eller, Not nearly as many people know the names of the three Skylab astronauts.

Austrian Is Second

Nelson of U.S. Snaps Streak Of Proell at 11 in Downhill GRINDELWALD, Switzerland, Jan. 13 (UPI1.—An 13-year-old American sucpt to world prominence today by accomplishing what the elite of women sklers

wunderwoman Annemarle Moser-Proell in the downhill. Cindy Nelson roared down one of the most decoranding tracks in the Alpinc world in 1 minute 52.24 seconds to win the first

haven't been able to do for the

past two years-beat Austrian

major race of her career. Miss Proeil, undefeated in 11 straight World Cup downhill races since 1972, was econd in 1:52.31 and Olympic downhill champion Maric-Therese Nadig of Switzerland third in 1:52.62. "It was just a perfect run."
Miss Nelson said. "I couldn't have

raced better. But I did not ex-Hank Tauber, the new U.S. Alpine program director, said, "I knew Cindy had all the potential to win a race, but I did not expcct her to explode so soon." Miss Nelson, standing out among the 65 entries from 19 countries in technical skill, necotiated the tricky bends in the upper section with surprising ease. With her performance, she joined the top contenders for next

month's world championships in St. Moritz, Switzerland. The victory certainly boosted my confidence," she said. "But it also meane an extra burden to

be counted among the world Miss Nelson's victory marked the first U.S. triumph in a World Cup race this season. The best previous finishes were two secand places, hy Barhara Cochran. in the giant slalom and by her sister Lindy in a special slalom. "Our skiers are improving well towards the world championships," Tauher sald. "We have all reason to look into a bright fu-

Tauber said the Grindelwald downbill track was "extremely difficult and very dangerous." "You need to be an excellent racer to win on this course," he said. "It requires enormous technical skill. Cludy had it. She will

find a similar track for the

world championship races at St.

Moritz," Miss Nelson clocked the best intermediary time in the upper section where she was 36 second ahead of Miss Proell, Both Miss Proell and third-placed Mirs Nadig gained on the lower part. but not enough to make up for Cindy's lead obtained in the sharp turn on the upper section. Miss Proeil, who had won all three downhills this season, said, "I have no explanation to offer. The winner must have been fast-

Cup standings and heading for her fourth straight World Cup overall triumph.

But the downhill defeat boosted

is still clearly ahead in the World

er. That's all I have to say."

Despite her defeat. Miss Proell

# U.S. Eliminated in Davis Cup

BOGOTA, Jan. 13.-The U.S. Davis Cup tennis team, which did not have its stars available for the American zone competition here, met with one of its earliest eliminations today as it was ousted by Colombia.

Jairo Velasco scored the de-cisive point as he beat a wornout Erik Van Dillen, 6-0, 7-5, 4-6, 6-4, in today's first singles to give the Colombians an insurmountable 3-to-1 lead in the best-offive-match series.

Colombia wou the opening two singles as Van Dillen, a doubles specialist, and Harold Solomon were beaten. Yesterday, the Americans stayed adve as Van Dillen teamed with Charles Pasarell to cut Colombia's lead to 2-1. The American pair heat Ivan Molina and Vallageo 8-4, 13-11, 6-4.

Valesco won the opening point for the South Americans Friday as he outlasted Solomon, 6-1, 3-6, 4-5, 6-3, 7-5, in a 4-hour match. The American was given oxygen at every by break as the effects of the althude—8,740 feet above sea level-and the match wore out Solomon.

Molina had an easier time with Van Dillen, winning 6-4, 7-5, 6-4 in a match started Priday but completed yesterday.

The Americans came here without their stars, Stan Smuth and Marty Riessen, both of whom played in last year's losing final to Australia. The United States had won the Cup the five previous years and 25 times altogether.

Tom Gorman, another top American singles player, is out of action with a had back as is Dick Stockton, Colombia now meets South Africa in the next

Chile Forfcits SANTIAGO, Chile. Jan. 13 (Reuters).-The Chilean Davis Cup team will forfeit its upcoming match with Sooth Africa, it

was announced here Friday. Hernan Basagottia, president of said Chile was withdrawing from the South American zone final for economic reasons. But other sources said the federation bad been under pres-

the confidence of her rivals who

# Men's Skiing Still Dominated By Gros, Italians, Collombin

MORZINE, France, Jan. 13 .-Picro Groe and his Italian teammates coutinued their comination of the men's World Cup giant slaioni today. Yesterday, Roland Coliombin of Switzerland reasserted himself as the world's top

downhiller.
Both Collombin and Gros scored their second straight ricturies their speciaitles. Gros, 19, had the fastest times in both heats to total 2 minutes 55.67. His fellow-Italians were not far behind as they captured four of the top five places. Last week when Gros, who now leads the World Cup standings, won the giant slalom, the Italians captured ell

five top spots.

today was Austria's Hans Hinterseer, who was .97 behind Gros. Then came defending World Cup champion Gustavo Thoeni, fourth was Erwin Stricker and fifth Helmut Schmalzl. Gros, with two firsts, a third and a fifth in the four World

Cup giant skaloms, has 100 points.

Franz Klammer of Austria, who

Breaking into the country's act

By Russell Baker

eagle on the door and some initials. The IDItlals spelled "OOFRA" a word that sounded imprecise and pleasantly neutral. A cheerful little man wearing

checrful little cye cheerful little suit opened the door and stuck out a cheerful little head. "Isn't that a cheerful little word?" he asked. "OOFRA. Say it out loud and you feel cheerier all over.

said it. It made me feel imprecise and pleasantly peutral. "What's is mean?"

What does it mean! What a silly question! It means exactly what it looks like it means. The first O stands for 'Office.' The second O stands for 'Official.' The stands for 'Federal,' and the RA stands for 'Reality.' This is the Office of Official Federal Reality. OOFRA. What a cheer-

ful sound!" I said I could understand that OOF stood for Office of Official Federal, but did not see how RA

stood for Reality.
"Oh come now," the little map
smiled. "You are having your little joke, R and A are the first two letters of the word 'Reality,' as you very well know."

"They are not," I said. "They are so," he sald.
"Says who?" I asked.

"Says the Office of Official Federal Reality," he said. He smiled, "The officially declared reality," he said. "is that the first two letters of the word reality are R and A."

"But the truth," I insisted, "is that the first two letters are R and E." "The truth," he said, "is a

philosophic concept beyond the proper concern of the federal government, The federal government can only deal with reality."

#### Sextuplets Reported Gaining in Cape Town

CAPE TOWN, South Africa, Jan. 13 (Reuters), -Mrs. Susan Rosenkowitz today handled all six of her bables in their incubators and, although all of the sextuplets were still suffering from jaundice, a medical bulletin reported that the condition was

well under control. Mrs. Rosenkowitz gave birth to the three boys and three girls by Caesarian section Friday.

NEW YORK-There was an He smiled, "But in order to deal with reality, someone must first officially declare what reality is. That is the job of OOFRA. One of our first acts was to make it an official reality that the word reality begins with the letters RA."

I saw. Here was a place that could cheer a man up. I asked if it was a fact that inflation was growing at a disastrous rate, as the unofficial reality of price tags would seem to suggest.

"Not to worry," he smiled "The official reality is very bright. We are going through an essentially one-time adjustment to higher energy prices and we are still making an adjustment to relatively short food supplies. These adjustments which are producing such skyrocketing prices will come to an end."

"The government has been predicting that for years. Prices keep

skyrocketing." Do not let your attitude toward the government be shaped by unofficial reality." the cheer-ful little man said. "If you persist in that course, you may never be able to feel cheerful again."

asked what other official reality he knew about that might improve the tooe of the day. The President has put Water

gate behind him and is once again fully at grips with the great tasks which the voters so overwhelmingly elected him to perform,"

"Do those great tasks include paying some income tax?" "With the worst of Watergate behind him," the little man continued, "the President has begun to rebuild his following in the country and will leave office in 1977 with public confidence substantially restored and excellent prospects of a complete vindication by history."

"Tell me about the coming economic boom."

"It will be a zinger," he said. "And the brilliant strategy for peace being pursued by Kissinger under the masterful guidance of President Nixon?"

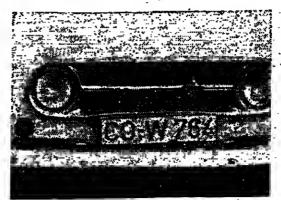

"It is working beautifully." He smiled I smiled. Official reality -what a wonderful ideal The cheerful little man was happy at seeing me happy, and he became confidential

"You want to know something?"

"Sure," I said. "The third letter in 'reality'

"No kidding?" I said.
"It is the official reality," he
ald, and smiled, and closed

# The West German Way With License Plates

By Elisabeth Piper

HANNOVER (IHT) .-- Foreigners who stop for coffee at a West German Autobahn-Rasistätte probably don't pay attention to the license plates on other vehicles in the parking lot, unless, perhaps, their eyes are caught by a plate spelling SEX. They might give another glance and perhaps see IS EX

Once one has noticed that the plates spell many words, spotting them and making phrases from them can become

Germans, of course, look out for German words and do pot regard ERA or NUDE as funny nor BIER as macabre. The plate most often asked for is, indeed, SEX, available (in ense) only in Stuttgart (local sign S) and Bad Segeberg

There are, of course, limits. The system works this way:

The first one, two or at most three letters in the plate indicate the city or small town in which the car is registered. Some of the 500-odd local signs are not useful for spelling words: of the booloan local signs and the beat give more scope for Reidelberg, for example, has HD. Others give more scope for a lot of words since there are one or two letters following the hyphen after the local sign.

The photographs show a couple of phrases put together in English recently. Other recent finds include the elaborate FEW MEN MINT NEW WORDS, DON'T GET HOLD OF A FLEA, HA HA and a passionate DINAH BE MINE.

Apart from the fun with the letters, the German system of license plates is effective. The legibility of the signs, black on white, is almost optimal. They are also easy to remember. Some people not only go for striking spelling, they also want catchy numbers like 999 or 747. Furthermore, reflecting license plates are now authorized in Germany, and people who have them pay extra-for being instantly recognized and identified.

#### Hamburger's Birthplace A Threatened Landmark

The birthplace of the American hamburger, Louis's Lunch in New Haven, Conn., is threatened by urban redevelopment. Kenneth Lassen, the present owner and grandeon of Louis Latten who first put a chopped beef patty between two slices of bread in 1900, is worried. The city plans to build a 12-story medical complex on the site. And although officials have said they are willing to compromise, Lassen told The New York Times: "They hem and haw and tell me to wait and wait. The next thing you know. a piece of American history will be sitting on the sidewalk." Hamburgers are still served as they were then on toast and with no ketchup, pickles or other modern encumbrances. Lassen still thinks he might overcome the eviction threat. Somehow every guy in the eight years this has been going on who tried to get rid of us has retired, gotten fired or moved away," he said. "The blg guy upstairs seems to like us."

While we're on the subject of food, word has been received from Newton, Ill., that local residents, who already claim to have consumed the world's largest hanana split and the world's largest hot dog, have now put away the world's largest pizza. At 50 cents world's largest plaza. At a high school baskethall game Friday pight feasted on the 13-foot by 5-foot pizza, which was baked in one piece in a specially con-structed oven. The Guinness Book of Records lists the previous largest pizza as 11 feet 8 inches by 3 feet 5 inches, baked in New York City on Jan. 9, 1971.

Robert F. Markley was so con-fident of winning the \$200,000 top prize in Michigan's state lottery that he chartered a bus to take 53 friends to the drawing at stland, near Detroit, last week. Markley, 37, a tavern owner, won the money and spent the first part of it on a party for his friends and customers. "One of my barmaids brought an astrology book some time back that said Jan. 10 would be my lucky day," he explained later. "I knew I was going to win the big one."

And while we're on the subject of religion, word has been received from Madison, N.J., that Pairleigh Dickinson University has introduced a course on voodeo. The instructor, Dr. Alexandre Abraham, a voodoo priest from Halti who speaks French and Creole, lectures his students through an interpreter while the ritual is acted out on a stage by barefoot practicers of the occult faith. Dr. Abraham had some trouble getting a visa to the United States, but the State Department finally came through with one when it was decided

OLD GRAD - George R Lockhart, 82, a high school dropout who received a master's degree in English history at Chicago State University yesterday. Lock. hart, who came to the United States at the age of 28 from the British West Indies. began studying again in 1958 after his retirement

that he would not compete with Americans working as vocated

Matador Mannel Benitez, E Cordobes, 37, is coming out 67 retirement this year, according to the Spanish news agency CIPRA He has signed a contract to fight 30 times in Spain and 10 times in Latin America—and will care about 2 million pesetas (\$35.000 for each eppearance, the agency

Actor Marion Brando was the highest paid performer in 1973, according to a report in Variety. The show-business newspaper estimates that Brando will make \$3 million from his 10 percent interest on The Last Tango in Paris," That comes on top of m estimated pet of \$1.6 million fer his role in the 1972 film "The Godfather." Variety also reports that "The Godfather" is at the top of the all-time film money makers with an accumulated total of \$85 million. The biggest moneymaker in 1973 was "The Poseldon Adventure," which has taken in \$40 million.

Brando's former wife, actres Anna Kashfi. 37, was married in Las Vegas Saturday to James Hannaford, 49, vice-president of General Systems Co., a southern California electronics firm. Mis Kashfi, a native of Calcutta, was divorced from Brando in 1961. They have our son, Christian, who is now 15.
